Dr. F. C. Allen  
Physical Education Dept.  
University of Kansas

Dear Dr. Allen:

As requested by you in our telephone conversation of this morning, I am submitting herewith the names of the twenty men participating in the government flight training program. The Civil Aeronautics Authority has asked that these men be ranked according to their relative athletic proficiency. We are hoping that your contact with these men has been sufficient for such a rating, but if you desire more information concerning any of the men, please let us hear from you. These men have all passed a quite rigid physical examination.
