

December 30, 1957.

Mr. Louis G. Hesselden,  
403 N. 12th St.,  
Albuquerque, New Mexico.

Dear Mr. Hesselden:

Pardon my delay in not answering your communication of the 13th instant sooner.

The Vestal Mechanical Laboratories, Inc. of St. Louis, Missouri, finished the auditorium floor where we play basketball. This floor is under the care of the superintendent of buildings and grounds, Mr. C. G. Bayles. It was he who made the selection of this product, as this floor was under his supervision during construction.

Frankly, if I had been making the selection I would have used the Seal-O-San finish, a product of the Huntington Laboratories, Huntington, Indiana. I believe Seal-O-San a superior product.

However both floor finishes are very good, as is the Hilliard floor finish, of St. Joseph, Missouri.

Very sincerely yours,

Varsity Basketball Coach,  
Director of Physical Education.
