

December 10, 1937.

Mr. W. H. Hukriede, Supt.,  
Lewis Public Schools,  
Lewis, Kansas.

Dear Superintendent Hukriede:

In reply to your letter of December 7th asking about a foot bath for athletes following the shower, I would suggest H T H, sodium hypochlorite. This solution is put in a rubber foot bath, a rubber container about three feet square and six inches deep.

Sincerely yours,

Director of Physical Education.
