8. Does Mum have all these qualities?
9. Name some Mum features.
10. Give some facts about Mum and fabrics.
11. Name some extra uses of Mum.
12. How should it be applied?

## ANSWERS

1. Daily bath, deodorant used regularly, teeth brushed twice daily, fresh underthings daily if possible, fresh hose daily, dresses or suits cleaned frequently.
2. Because everyone is subject to unpleasant perspiration odor, whether there is noticeable moisture or not.
3. No. The bath washes off old perspiration. It cannot guard against future odor trouble resulting from close rooms, tight clothing, nervousness or fatigue.
4. Yes. In winter, close rooms, little exercise and tight, heavy clothing may bring on disagreeable odor that is all the more noticeable in the close, heated atmosphere of winter living.
5. (1) Creams which stop odor, but do not stop perspiration.  
(2) Liquids which check odor by checking perspiration.  
(3) Creams which check perspiration.  
(4) Powders which discourage odor.
6. Type 1 --- MUM is a smooth, velvety white cream which takes the odor out of perspiration, but does not interfere with this natural function of the body.
7. It is lasting, safe to use on any part of the body, non-poisonous, non-irritating, easy to use, soothing to the skin, and harmless to fabrics.
8. Yes, plus several others.
9. Quick and easy to use, harmless to clothing, soothing, absorbs quickly, lasting, does not prevent normal perspiration, pleasant to use summer and winter, may be used right after shaving the underarms.
10. MUM is harmless to fabrics --- as demonstrated in tests made by the American Institute of Laundering and by Good Housekeeping Bureau.
11. To remove onion or fish odor from hands. For use on sanitary napkins. To stop foot odor.
12. A fingertipful is enough. Smooth in thoroughly.
