(Copy)

Dear Sir;

For the purpose of doing----- really doing -----
things that just now assume great importance in winning the
war, your careful consideration is invited on the suggestions
contained below.

By the plan here outlined, some valuable and necessary
preparation, skill and practical experience can be provided
for women, or young men, who otherwise may not be able to
help in what will quite soon be about the most important work
of this nation---- to SAVE EVERY CROP OF WHEAT, and at the
same time secure very pleasant and profitable employment for
the summer.

During the past summer the writer spent his entire
"vacation" scooping wheat out on the High Plains, incidentally
winning TWO hard-fought contests in scooping, and earning top
wages while constantly gaining weight on account of the sumptuous meals that almost every farmer provides for his harvest
helpers.

Sincerely

Ashton Keith
