

January 20, 1939.

Messrs. Guy Keeler and Fred Montgomery,
Extension Division,
University of Kansas.

Dear Guy and Monty:

I had no idea that an academician had enough business ingenuity to put power in everybody's automobile, or at least have an incentive to put power there.

If the Kiwanis Club had not pepped up the sale for the crippled children I never would have known the true fact. We will make it a point to buy some gasoline at 19th and Massachusetts, even though it is out of the way for us. I will keep that very definitely in mind.

Cordially yours,

Director of Physical Education,
Varsity Basketball Coach.
