

G

July 25, 1939.

Mr. P. O. Klawuhn,
302 Charleston Apartment,
St. Joseph, Missouri.

Dear Mr. Klawuhn:

I feel that I should give you a progress report on Bob's work in the Sumner School. As you know, he transferred from the School of Engineering to the School of Education, hoping that he could take courses more to his liking.

Bob's instructor in Zoology feels that he is accomplishing absolutely nothing in that course, and we have requested that he be withdrawn rather than to let him go ahead and finish the course and receive a failure in it.

This transfer from the School of Engineering was an experiment which I feel was justified. Bob has been given a chance in other courses, and for some reason he simply is not able to make it. I have asked him to come to my office this afternoon, at which time I want to go over the matter with him. If you are coming to Lawrence any time soon I should be happy to see you. It may be that Bob will be much better off in some other line of endeavor, rather than going to college.

Very sincerely yours,

Director of Physical Education and Recreation,
Varsity Basketball Coach.
