

#2 - Mr. W. F. Kingsbury.

association that I know of accepts any such financial responsibility. If a boy should be on the Glee Club and be injured even in his line of work the common conception would be generally that the boy would pay his own bill. But if a boy is on an athletic team the assumption has grown up somehow that the athletic association should pay the bill.

Coach Mike Getto went to the hospital and got the records of the time that Leo was admitted to the Watkins Student Hospital. He also checked up on the time he was out to spring practice. The general feeling at the time of Leo's illness was that while the Athletic Association was not responsible, they would like to help Mrs. Johnstone with a part of the expense as she is a widow, and not because they were liable on account of any activity that Leo indulged in during the practice period.

I am passing on this correspondence to Mr. Gwinn Henry with the hope that some reasonable settlement can be had that will make everybody feel that all hands are cooperating fully. I personally referred this matter to Dr. A. J. Anderson, and I believe if the matter were taken up with Dr. Anderson he would recommend a fair settlement for all concerned.

Very sincerely yours,

FCA:AH

Director of Physical Education.
