

#2 The Basketball Rules for 1931-1932.

The Committee discussed blocking at great length and appointed a special committee to prepare an article discussing the various phases of blocking. This committee will also attempt to prepare diagrams and possibly submit photographs to illustrate blocking, which is always illegal, and "screening", which is often legal.

Various proposals were discussed with a view to reducing free throws. These plans would eliminate the free throw penalty in the case of certain personal fouls, and would merely charge a personal foul to the offender. This problem was referred to the rules revision committee for further study during the next season.

George T. Hepbron, Chairman Rules  
Revision Committee.

Oswald Tower, Editor.
