

December 14, 1943.

Mr. Wm. J. Braun, Coach,  
Lecompton High School,  
Lecompton, Kansas.

Dear Coach Braun:

I am enclosing the diagram of the shooting lanes where bank shots are to be used. In the area outside of these lanes you would shoot directly for the basket. If there is any further question you desire to ask, please write me.

The diagram of the backboard for shooting practice is based on the four by six backboard. You can use these measurements to diagram your lima bean backboard by projecting these lines out away from the basket. The air paths for a high arch shot, I believe, are plainly enough illustrated to teach the boy to shoot high enough so that he will over-shoot or bank the ball and if any fall short they will go into the basket.

I have ordered some copies of "Better Basketball" and they should be in this week. If you will send me your check for \$4.00 I will be glad to pay the postage; otherwise, by the time you send a book c.o.d. the collection and return postage amounts to about \$4.36. By the time your check arrives the book should be here and I will be glad to autograph it if you have any suggestions as to what you want above the autograph.

Thank you for your kind remarks regarding the meeting in Kansas City. I enjoyed it.

Sincerely yours,

Director of Physical Education,  
Varsity Basketball Coach.
