Dr. F. C. Allen,
University of Kansas,
Lawrence, Kansas.

Dear Doctor;

Thanks for your nice letter of November the first, you will never know how much I appreciate the interest you have taken in me. Well I am still getting by with the milk business and odd jobs at a golf course. I had a trainees job lined up with the city school board, but the grand jury indicted them, the court found four guilty and two quit, so that let me out. The new board was not hard to sell, but the previous board spent all the money and the present board is broke and in the red. I missed a good place on the west coast by not knowing that there was an opening, I was one week late with my application. I may care for the A. A. U. basketball team here this winter. Welenhauser your old center is playing for the city team. One of the coaches at O. U. told me that Ted Owens was in poor health and that his work was not up to par this fall.
