Dr. Forest C. Allen  
Director of Physical Education  
University of Kansas  
Lawrence Kansas.

Dear Mr. Allen

I understand that you have been using some kind of tablets to check the out break of boils on your squads. We have several cases now and they are responding to treatment rather slowly. If you have any suggestions to make they would be most gratefully received.

Well Doc. I am certainly going to miss my many good friends in the Big Six but I feel that my move away from Missouri will prove to my advantage. We certainly have a grand gang on the staff here.
