Dr. F. C. Allen:

Dear Dr. Allen;

The suggestions contained in your letter of August seventh are fine and workable, I am sure. Your strategy of using Bluegrass sod is probably the best for the situation, and the natural run-off will result, I believe in a fair drainage of the court.

My comment is: go ahead and build the lawn bowls court. It is a grand location.

Very Sincerely,

W. D. D. well.
