

July 2, 1937

Dr. F. C. Allen  
Department of Physical Education & Athletics  
University of Kansas,  
Lawrence, Kansas.

My dear Dr. Allen:

I have been advised through New York University and also through Springfield College to write to you in regard to a position as Director of the General Physical Education Department. I understand that I have been recommended to you by both these Institutions and should like to make formal application for the position.

You undoubtedly have received my credentials from the Placement Bureau of the above Institutions, and should like to say that if there is any additional information you would like to have me furnish I will be glad to forward it to you.

I have had twenty years experience in the allied fields of Physical Education including Health Education, Athletics and Recreation. During these twenty years experience seventeen years were spent as Director of the Physical Education Department.

My training has provided me with experience in all phases of work, including High School, supervision of the Public School System, Teachers College, College, and University Programs. I am well qualified to direct the work in general Physical Education, Professional Training in Physical Education, and Recreation. I am a native of Kansas, and graduated, as you will note in my educational background, from Kansas State. I played on the Varsity Baseball and Football teams while a student there. I am sure we have mutual acquaintances. Although we are not personally acquainted I have known you and your work for many years, especially those excellent basket-ball teams you had at K.U.

Mike Ahearn and Guy S. Lowman were my former coaches years ago and are familiar with my work and study since graduation.

Dr. A. K. Aldinger, Director of Health and Physical Education for the Public School System of New York City was formerly Professor of Education at the University of Vermont, where I served as his Assistant for three years. I presume there is a letter from Dr. Aldinger in the mail, furnished from the Placement Bureau of New York University, but should you care to write him direct I am sure he will be only too glad to write to you in regard to my qualifications for the position.

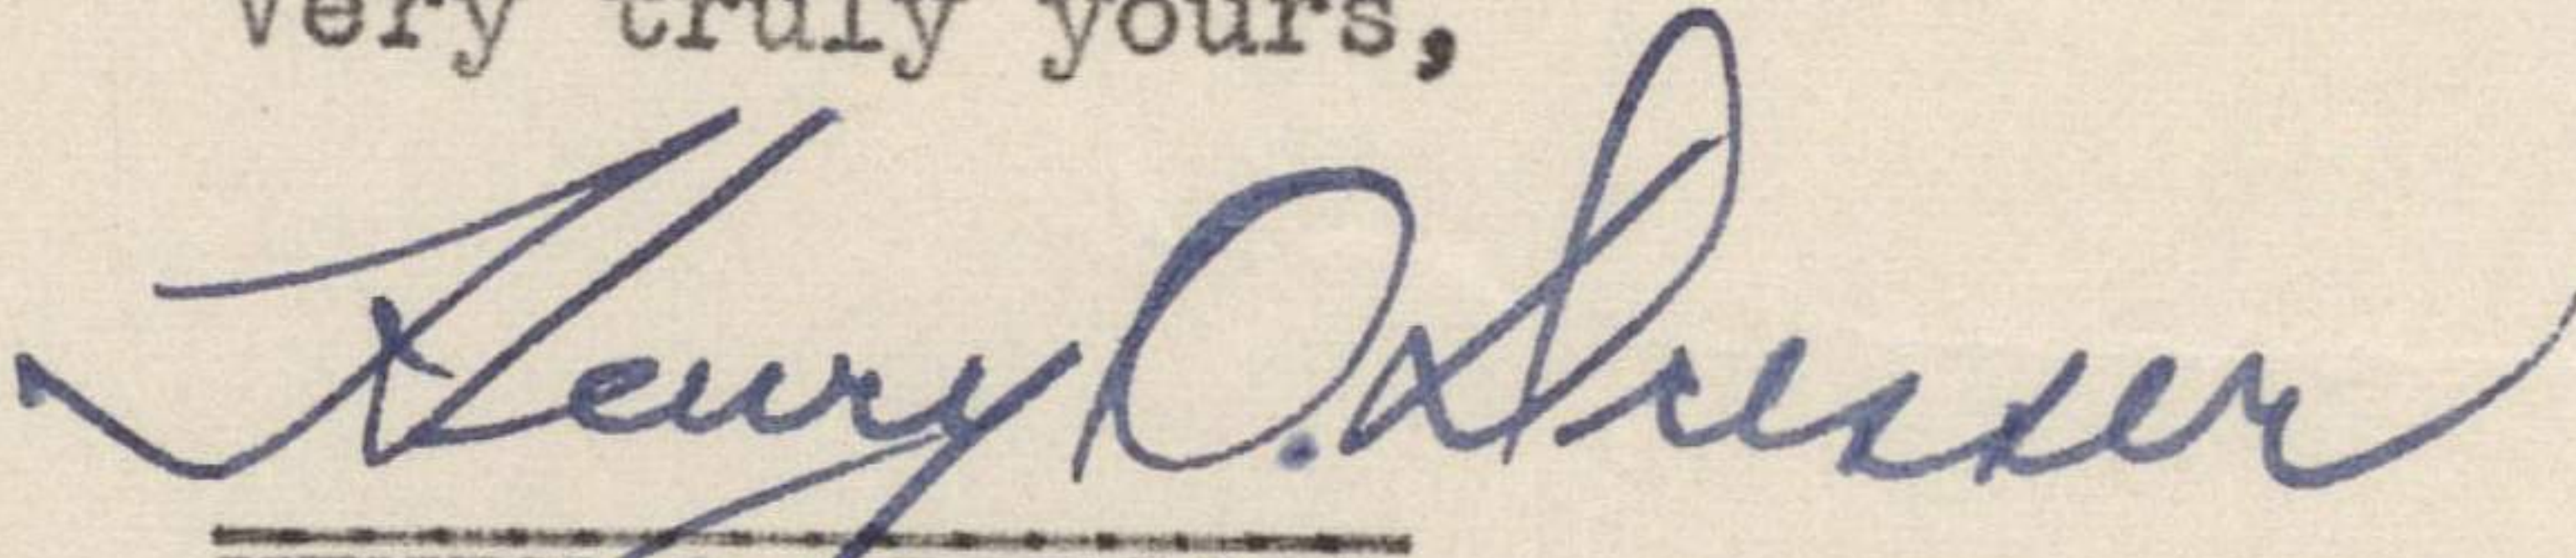

Louis S. Schroeder, Superintendent of Recreation for the City of Pittsburgh, Pennsylvania, is also in a position to give you first hand information

in regard to my qualifications should you care to write to him direct.

I will be glad to come to Lawrence for an interview should you feel it advisable.

Very truly yours,

  
HENRY O. DRESSER

July 1, 1937

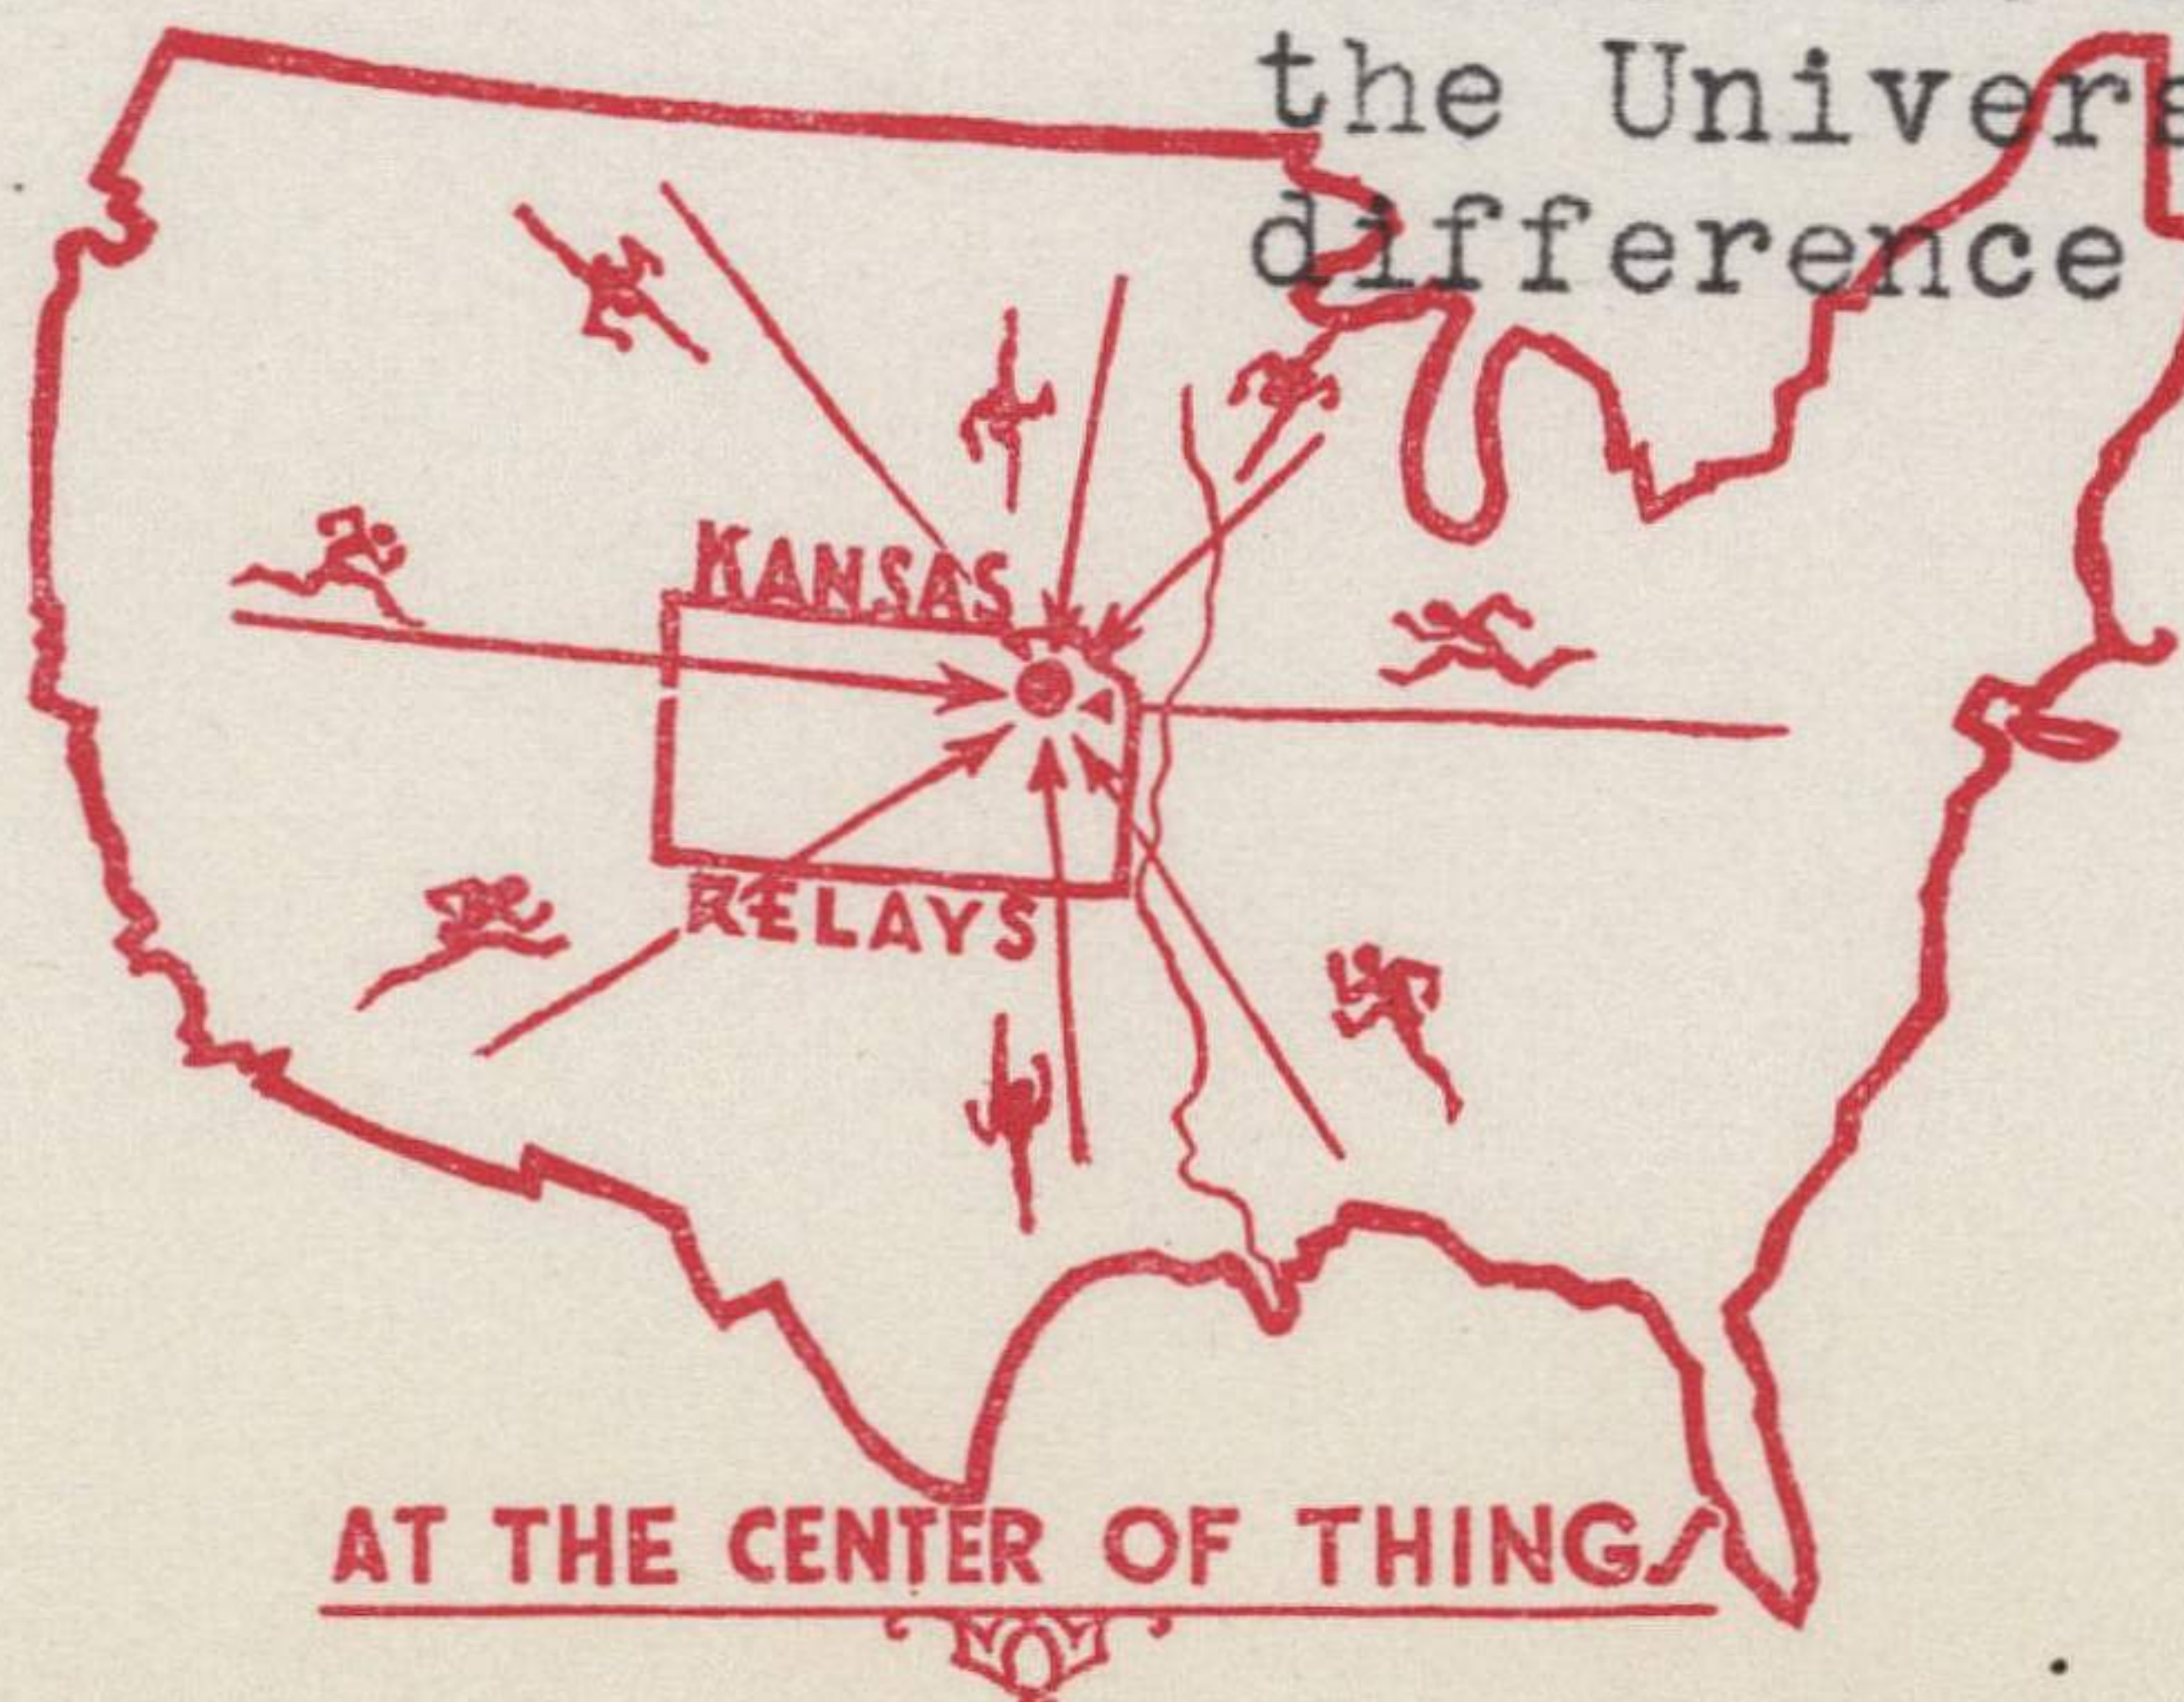

Dear Doc:

Just returned from the field house and sending a wire to you. As I mentioned in the wire Kistler decided that he could not afford to take the drop but was rather reluctant at that because as I have explained there are some things in the situation here that do not look too good. While I was over there I met Voltmer, whom I mentioned for the situation last fall. Of course he is out of our price range now. I talked with him at length regarding Lapp and Wendler. I have a great deal of faith in Voltmer and he was very outspoken regarding Lapp. He said that he has often been amazed at the ability of Lapp to hold his own before a critical audience.

Voltmer said that granting the fact that one's first impression of Lapp may not be too good, this is soon overcome by his outstanding intellectual ability.

I have talked to several others since last writing to you and the balance seems much in favor of Lapp for his wearing ability and possibility of development. It may seem to you that I have not at times been consistent regarding my statements but I have tried to keep you informed as to the best information I could get. Voltmer settled one doubt in my mind and that was as to Lapp's ability to carry on before a group. He feels that this is one of his strongest points.

While at the field house I also learned that the failure of the Physical Ed. office to turn in the results of my qualifying exam. and my French exam. before last Friday may cost me an extra summer here. Of course it would not make a great deal of difference to the University of ~~Howath but fourth annual~~ *Howath but fourth annual* a great deal of difference to me if they cannot get it straightened out.

*Kansas Relays*  
Sincerely

*April 18, 1936, Lawrence, Kansas*

DIVISION OF PHYSICAL EDUCATION AND  
INTERCOLLEGIATE ATHLETICS

June 28 , 1937

Dear Doc:

Your letter came this morning. I had planned to write you this afternoon because Kistler was to let me know today whether he would be interested enough in the situation there to take a trip down to see you. However, my arrangements went haywire and I have not been able to see him thus far today. I am so confident that he will decide not to look into the situation that I will write without seeing him. Will write you immediately if he is interested. I had a long talk with him Friday, and as I said before there seems to be a chance for advancement here and the salary there would be about 500 dollars <sup>over</sup> ~~under~~ what we have to offer, but even at that he liked the idea of the straight teaching position there.

Kistler put me out on a limb a couple of times and I found that a couple of his questions were pretty hard to answer. In the light of my own experience, of course I could not assure him as to salary advancements and advancement in rank and so on. In any event, I told him that twenty eight hundred was the limit and put the proposition as fairly as I could to him.

Had a conference with Dad Schroeder regarding Lapp and have talked to several others regarding him. Aside from that I had the opportunity to observe him around here for sometime before he left town. As near as I can find he has but one great draw back and that is the fact that he certainly does not look the part for Physical Education. He certainly does not have that drive that one would want and he is very large and loosely hung together. Depends upon his belt to assume the responsibility of his abdominal muscles. In this respect I cannot see him in the light of Dean Schwegler's critical eye as to posture. I told Lapp that he could get about \$2600 and I am sure that he would come for even less than that..

Dad says that by far our best bet would be Arthur Wendler. Has his PhD but only a couple of years experience. I have met him, but he is not here this summer. Is teaching Physical Ed theory classes for graduate students at Alabama Tech at Auburn, Alabama for the summer. He will go on full time here when he comes back in the fall but since Kistler is ahead of him he will not get a very good salary. Kistler himself would favor Wendler over Lapp. He graduated from one of the Normal Schools in Wisconsin, I think La Crosse. Could coach golf and tennis, if necessary. Is an expert gymnast and Dad says would be willing to

# UNIVERSITY OF KANSAS

LAWRENCE

DIVISION OF PHYSICAL EDUCATION AND  
INTERCOLLEGIATE ATHLETICS

do practical work if necessary. Could teach the course in Tests and Measurements since he used to be employed by the Physiology Department and has done much statistical work for the Physical Education Department. I just talked with Dr McCloy's secretary regarding him and she feels much the same as Dad. Neither have anything particular against Lapp other than that he does seem to lack that drive. Miss Metheney says that after you learn to know him he is really a "grand person". She points out that you could not go wrong but leans toward Wendler as the type who would work himself to death to help put a job over. Dad says that he would be a good investment and that seems to be the general opinion. He has worked hard all his life. By the way he is married and has a boy six years old.

I asked Miss Metheney if she would have the placement bureau send his material to you. Dad says both of them are smart boys but Wendler leans a little heavier toward the personality that will cause him to grow more rapidly. Dad thinks that you could get Wendler for \$2500 for the nine months.

Well there is the dope and I will write you as soon as I see Kistler but I am sure that he would not be satisfied at what we have to offer.

After reading this over it seems that I have not done Lapp any favors certainly, but I want you to get my impression. Although short and stocky it seems that Wendler would fit a little better with the undergraduate student.

I got the courses that I wanted, but now I wonder why. They are certainly keeping me on the go. Physiology of the Nervous system and Physiology of Exercise are both interesting but the good old prof won't let me catch up with him.

If you are interested in Wendler, write directly to him at the above address.

Sincerely,

Ed.

Dean Raymond A. Schwegler  
School of Education  
University of Kansas

Dear Dean Schwegler:

I am enclosing herewith correspondence and communications in regard to Dr. Kistler and Dr. E.W. Lapp who are possible candidates for the position of instructor in the Department of Physical Education.

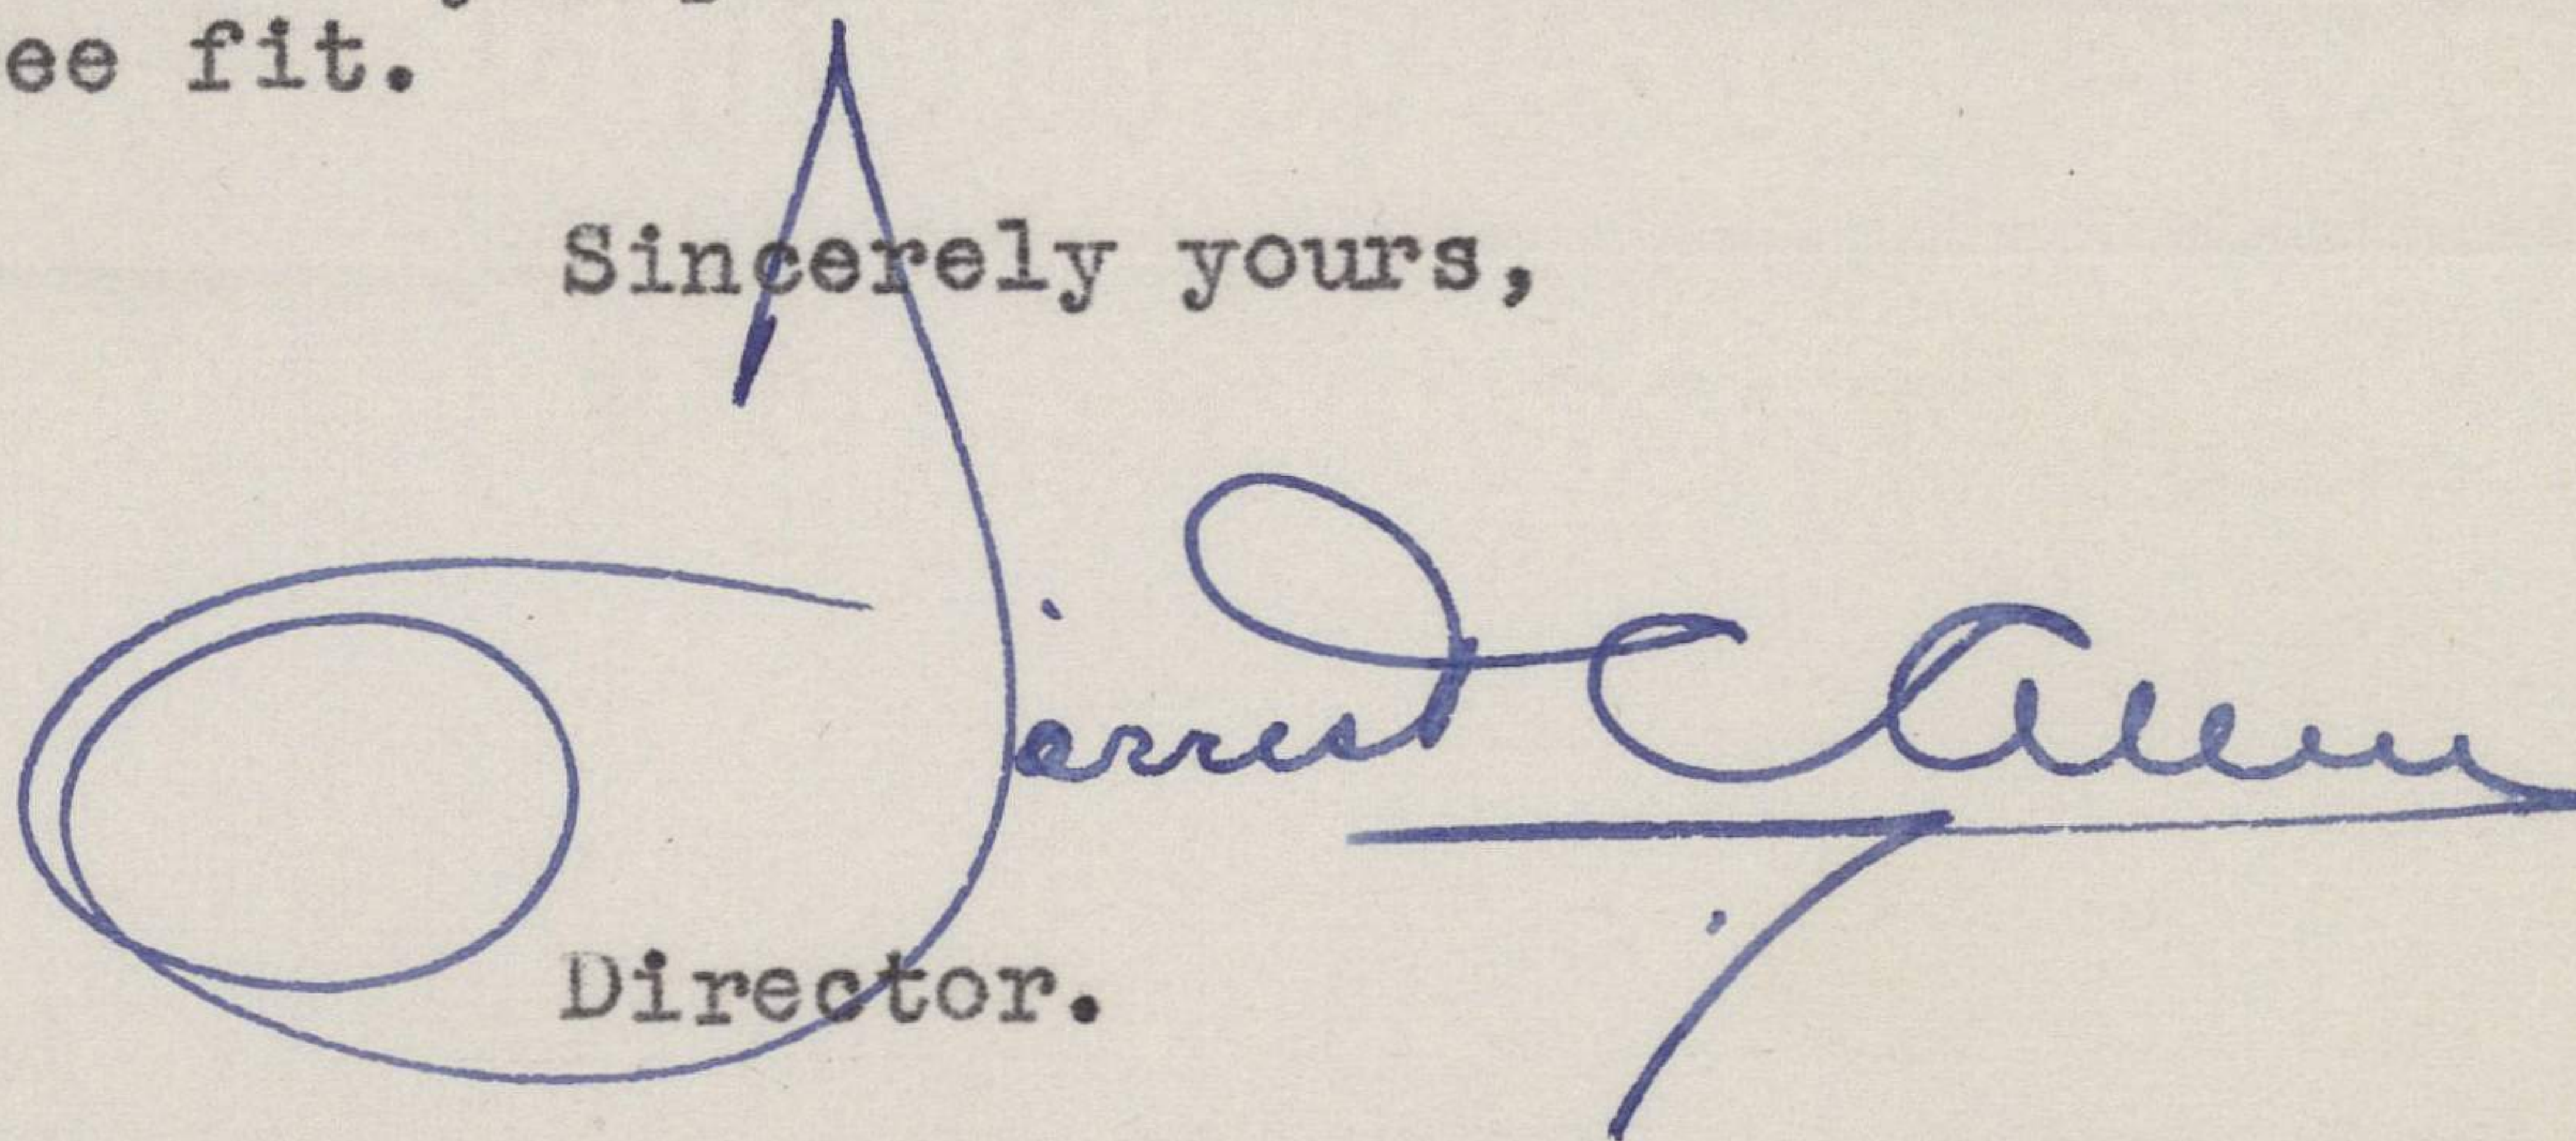

From Mr. Elbel's letter it appears that we may have some difficulty in getting a man with a Ph.D. degree in Physical Education at the salary figure we have to offer.

I am placing this material before you so that you may give it your casual observation until we have final word from Mr. Elbel as to whether or not Mr. Kistler will be available. It may be well for you to give Chancellor Lindley a progress report on our activities for a desirable man.

After reading the material you may call me at my home, Number 300, where I am working on the manuscript for my new book on basket ball.

My purpose in giving you this material at this time is to have you pass on to the Chancellor a progress report when you see fit.

Sincerely yours,

Director.

FCA: IW

P.S. After you have finished with the correspondence and data will you please return it to my office or leave word and we will pick it up when you have finished with it.

DIVISION OF PHYSICAL EDUCATION AND  
INTERCOLLEGIATE ATHLETICS

Sunday afternoon

Dear Doc:

Had a long talk with Kistler. His is the boy that you had in mind. He is ~~much~~ interested, or rather will be interested if the proposition which they have before the president here does not go thru. The new plan for him would net a total of thirty six hundred for the year including work in the regular session and during the summer. To me, his position here would not appear to be a very interesting one since they will have his attentions divided from coaching freshmen teams in three sports to continuing his charge of practice teaching in the Experimental School to teaching theory courses in Physical Education and directing of Graduate Theses and a few other things. He would keep the job here and be perfectly happy, though he may work himself to death. He is none too optimistic regarding the possibility of the president passing upon the new arrangement but McCloy thinks there is no doubt but that it will go thru. He will know in a couple of days. McCloy was very outspoken relative to the possibility of <sup>NOT</sup> securing a man of Kistler's experience and qualifications at the salary that we have to offer. In fact he feels that we are going to <sup>HAVE TO</sup> sacrifice experience to a certain extent to get a man with the advanced degree. I am beginning to think that a PhD in Physical Education would demand a pretty good salary in most schools.

As I mentioned in the night letter to you Dr. McCloy indicated as his second choice, Vernon Lapp, who wrote you very early in the game from Kansas City where he is employed. He has had five years experience in all. In the five years ought to have a pretty good idea as to the public school situation. He has been making a special study of the work in the past three years in Kansas City. In his previous position he taught all of the Physical Ed. (girls and boys) in a town of two thousand in Wisconsin. <sup>2 yrs</sup> He comes from a long line of University people. His father is on't he faculty at the University of Michigan and his brother is in the Physics Department here. He came out here to see me last night. He and his wife are stopping a couple of days en-rout to a small town in Wisconsin where they will spend a good part of the summer. Lapp is a very large chap-not

too trim in appearance. But apparently from what I can learn he is very bright and talks intelligently on Physical Education, which is not always the case with PhDs. He is very enthusiastic regarding a University position and has possibility of development. He worked in research under McCloy and Mc feels that he has the possibility of developing along that line in a manner that few men will develop in the field of research in Physical education. He has a mathematical turn of mind, and that feature should be an aid to any department. He is an excellent student.

Lapp will see that you get detailed information regarding him in the course of a few days. I am convinced that we will not get Kistler and the fact that Lapp would take an advance be stepping into a position that he really wants at twenty six hundred makes me think that there are things in his favor there. He would be more apt to consider the move a real advancement. Lapp does not have the fire that Kistler does but it would be a little difficult to have the latter adjust himself after working with the facilities that they have here. McCloy suggested another fellow by the name of Wendler that he is going to take on here for a couple of years. He has had but two years of experience and would be a good man as far as practical physical activity courses are concerned but would have difficulty as to theory.

Dad Schroeder has been out of town. I am to see him tomorrow. I will let you know what he says. But it looks like we will have difficulty in getting anyone with a PhD <sup>EXPERIENCE</sup> who does not feel that he is stepping down.

I have not seen Prof Tuttle about courses because he has been out of town. I am sure that he will ok what I have arranged. I have two hours of hygiene and six hours of advanced Physiology on the list. The grind starts tomorrow. We are very comfortably located in a fine apartment- the first floor of an old home that has been well kept. The lady who owns it will spend the summer in the East- a very close friend of Dr. Sherbon of Lawrence-.

I will drop you a line as soon as I can find whether or not Kistler will be interested. As I suggested in the wire, twenty eight hundred with additional summer work was not too enticing.

Dr Forrest C Allen  
University of Kansas  
Lawrence, Kansas

Dear Dr Allen:

How are you progressing with the matter of appointments on your staff concerning which I wrote you about a month ago? Not having had any reply I am assuming that you did not find the applicant recommended highly desirable, consequently I am taking the liberty of including herewith the credentials concerning one other man in whose qualifications I believe you will find many, if not all, of the requirements for the appointment you have in mind. I am referring to Mr. H. O. Dresser whose personal address is 56 Pierrepont Street, Brooklyn, New York. Dresser is now forty years of age, 5' 8", weight 145, unmarried. He is a native of Kansas, having graduated from the high school in Manhattan and also from the state college in the same place. This was in 1914 that he received his B.S. degree in general science. He came to Springfield and secured his Bachelor of Physical Education, since then has been attending various summer schools and graduate schools. From the New York University he received, in 1933, his Master of Arts degree and has almost completed his work for the doctorate at New York University now. I will give you a brief summary of his experience: 1917-1918 he was in charge of the physical work of the Englewood High School; 1919-20, director of recreation in a large industrial concern in Southbridge, Massachusetts; from 1920-24 he was director of athletics in Technical High School in Springfield, Massachusetts; 1924-25 he went to the public schools of Winchester, Massachusetts as supervisor of physical education; 1925-28 he was at the University of Vermont as assistant director of physical education and coach of varsity sports. This is where he served under Dr. Aldinger who was then the director there, and who now is the director of health and physical education for the public schools of New York City, with his address at 157 East 67th Street. From 1929-32 he was at the State Teachers College in Pennsylvania as director of physical education and athletics. He then came back to New York City and took a part-time proposition and studied at New York University in the graduate field. For two or three years now he has been director of the recreation training schools, 107 Washington Street, New York City, and has from every report which I have been able to receive scored a very decided success.

At my request he has prepared for himself an outline of his training and experience which I am enclosing herewith as a separate credential. I believe with this information in hand you will be in a fair position to estimate his qualifications. I might say that

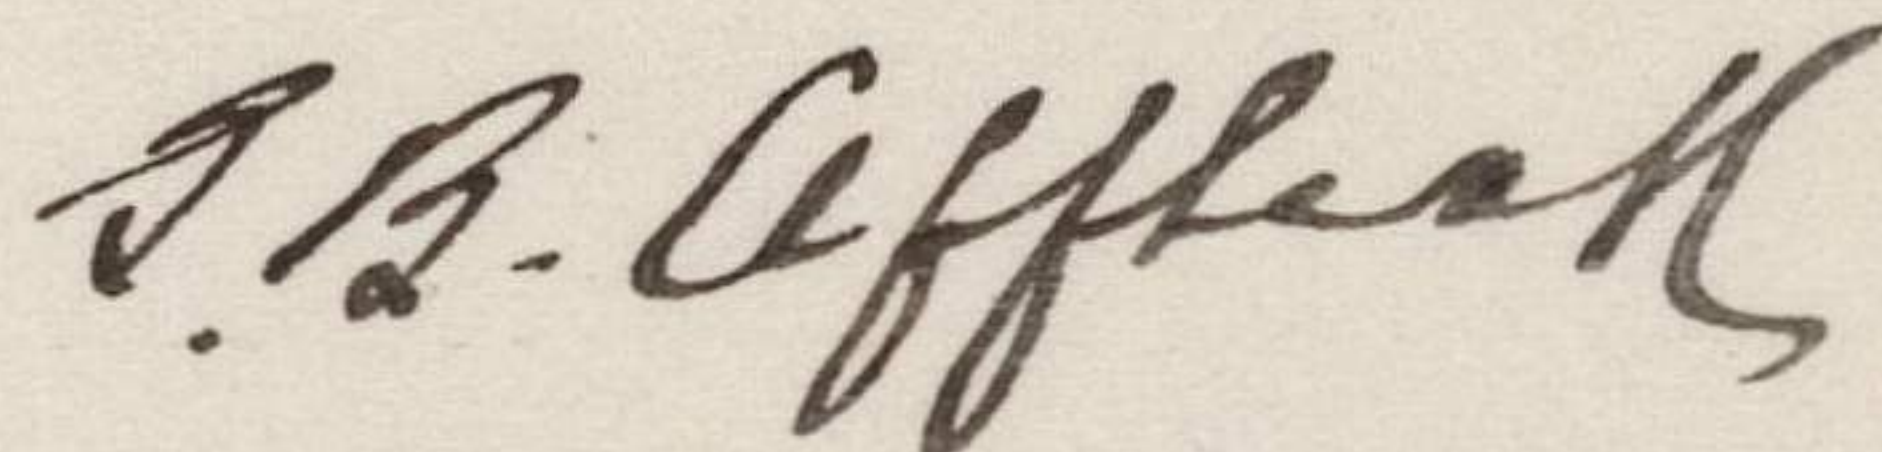

if you wish to inquire further concerning him the following men know him either as a student or an employee, and you might communicate with them for details:

Dr A K Aldinger, whose address I have already given you, 157 East 67th Street, New York City; Dr Paul Klapper, College of the City of New York, Convent Avenue and 139th Street, New York City; Dr L U Lawton, New York University, Washington Square East, New York City; Mr. Louis Schroeder, City Building, Pittsburgh, Pennsylvania, where he is superintendent of recreation for the city.

I feel that Dresser's all-round experience and success qualify him very well for favorable consideration for the position which, as I understand, has not as yet been filled on your staff.

I shall be glad to hear from you at your convenience.

Very sincerely yours,

Director of Placement Bureau

Education:

Bachelor of Science degree, Kansas State College, 1914  
Bachelor of Physical Education, Springfield College, 1917  
Graduate study Harvard University, 1924-25  
Graduate study State College for Teachers, Albany, N.Y., 1929  
Master of Arts degree, New York University, 1933  
Candidate for Doctor of Philosophy degree, New York University, 1937. (Completed requirements for Doctor of Philosophy degree with the exception of dissertation, problem accepted.)

Experience:

Administrative:

Present Position:

1. Executive Administrator, Recreation Training School, Works Progress Administration, New York City

I organized the Recreation Training School in 1934 and set up the policy, scope and organization, selected the personnel, including assistants, office staff, and faculty, set up the curriculum and course content. I have operated the School for two years with an enrollment of 1000 students, each student with a minimum requirement of two hours per week in training.

October 1st, 1936 we secured the services of Dr Frank S Lloyd of New York University as our part-time Director. We then re-organized the School to include four Divisions of training, as follows:

1. General background instruction with visiting faculty of educators from the institutions of higher education in New York City.
2. The Physical and Social Skills Division.
3. The Arts and Crafts Skills Division.
4. The Demonstration Laboratory Division.

The present enrollment of the School is 2500 students with a minimum requirement of two hours per week in training.

As executive administrator, my duties are to conduct efficiently the operation of the entire school.

- - - - -

2. Instructor, Teacher Training Division, School of Education, College of the City of New York, 1933-37.
3. Director of Health Education and Athletics, State Teachers College of Pennsylvania, 1929-1933. Head coach (football, basketball, track).

4. Assistant Director, Health Education and Athletics, University of Vermont, 1925-1928.  
Assisted Dr. A K Aldinger, Director, with the administration of the department, having full charge of all freshmen required physical education, intramural athletics, varsity coach of football, basketball, ice hockey, and baseball.
5. Director of Health Education, Public School, Winchester, Mass., Elementary, Junior and Senior High Schools, 1924-25.
6. Director of Recreation, American Optical Company, Southbridge, Mass., (3500 employees). Organized athletic association composed of employees, approximately 300 members. Organized inter-departmental recreation activities and athletic leagues, etc., January 1, 1919-September 1, 1920.
7. Director of Physical Education and Athletics, Technical High School, Springfield, Mass., 1920-24.
8. Director of Physical Education and Athletics, Supervisor of Playgrounds, Englewood, New Jersey, 1917.

### SUMMARY:

#### I. A. Organization.

Have organized courses of study in Professional preparation in theory and practice as follows:

##### Theory:

- |  |                                     |
|--|-------------------------------------|
| 1. Personal Hygiene  | 6. Child Guidance                   |
| 2. Public Hygiene  | 7. Administration of Tournaments    |
| 3. Building Hygiene  | 8. First Aid                        |
| 4. Organization of Recreation Programs   | 9. Principles of Physical Education |
| 5. Administration of Athletics   |                                     |
| 10. Office Management (athletic fields, equipment, gymnasium, swimming pools, locker rooms, schedules, etc.) |                                     |

#### B. Recreational Activities

- |   |                   |
|---|-------------------|
| 1. Boxing   | 4. Tap Dancing    |
| 2. Wrestling  | 5. Social Dancing |
| 3. Fencing  | 6. Modern Dancing |
| 7. Coaching (football, basketball, baseball, track) |                   |

#### II A. Teaching

- |                                |  |
|--------------------------------|--|
| 1. Hygiene of the School Child | 4. Athletic Management                                     |
| 2. Seasonal Activities         | 5. Administration of Athletics                             |
| 3. Personal Hygiene            | 6. Coaching (football, baseball, track, basketball, golf). |

#### B. Coaching Experience

1. College and University (football, basketball, baseball, track, ice hockey, golf).
2. High School (football, basketball, baseball).

#### C. Lecturer. Topics:

1. Education for Leisure
2. Educational Factors of Competitive Sports, etc.
3. Topics related to Physical Education and Health.

Dr. F. C. Allen  
Director of the Department of Physical Education  
Kansas University, Lawrence, Kansas

My dear Dr. Allen:

Saturday evening I had a conference with Mr. Elbel, of Kansas University. As a result of the conference, I wish to make a formal application for the position which is to be open in your department.

As you no doubt recall from my letter last winter, I am much interested in getting into a teacher training institution where it is possible to direct research leading to advanced degrees.

My experience consists of five years work in the field of physical education as a teacher and eight years as a student at the State University of Iowa. During my graduate work I was research assistant to Dr. McCloy (Pres. Am. Phys. Educ. Ass'n.) and an assistant to W. W. Tuttle (Associate Professor of Physiology) both of this institution.

Professionally, I am chairman of the Research Section of the Central District (10 states) of the American Physical Education Association. During the past five years I have presented the following research papers at the Central District meetings:

1. "Pupil Objectives in High School Physical Education," Wichita, 1933. Published.
2. "Likes and Dislikes of High School Boys in Physical Education," Minneapolis, 1934. In press.
3. "A Grading System for High School Physical Education," Omaha, 1935. In press.
4. "Absence from School - Influenza - Physical Education," Denver, 1937. In press.

In addition to the above articles, I have two technical papers that have been published. They are:

1. "An Analysis of Movement on the Basis of Latent Times and Variabilities."
2. "A Study of Hammer Velocity and the Physical Factors Involved in Hammer Throwing."

PHYSICAL EDUCATION AND  
INTRAMURAL SPORTS

D. H. MINER  
ATHLETIC MANAGER

I am sending some reprints under separate cover. Will you please return, at your convenience, the Oct. 1935 number of "Mind and Body," as I have only two copies of this publication. The others I present to you with my compliments.

The Teacher's Appointment Bureau of the State University of Iowa is sending a file of my credentials. If you wish any additional information, I shall be glad to supply it.

In case you wish a personal application, I shall be glad to come to Lawrence. I expect to leave Iowa City June 19 for Wisconsin, where my wife, my 21 month old son, and I are to spend our vacation.

Very truly yours,

*V. W. Lapp*

Iowa address until June 19, 1937

June 14, 1937

Dr. F.C. Allan, Head  
Physical Education Department  
University of Kansas  
Lawrence, Kansas

My dear Dr. Allan:

I am sending you the credentials of Dr. Vernon Lapp of Kansas City whom Dr. McCloy is recommending for a position on your staff for the coming year. Dr. Lapp made an excellent record here as a student and as a research man and has maintained a very high record in Kansas City. We are pleased indeed to send this material for your consideration.

Very truly yours,

Frances M. Camp  
Director  
Committee on Recommendations

DEPARTMENT OF PHYSIOLOGY

THE STATE UNIVERSITY OF IOWA  
COLLEGE OF MEDICINE  
IOWA CITY, IOWA

July 28, 1937

Dr. F. C. Allen,  
Director of Department of Physical Education,  
University of Kansas,  
Lawrence, Kans.

My dear Dr. Allen:

Since I returned from Lawrence, I have received two communications from you. The letter of welcome was appreciated and I sent it on to Mrs. Lapp who also received it very kindly. The Kansan was also welcome.

I have had a conference with Mr. Elbel and we have decided as many things as we thought wise. My wife is returning tomorrow and we shall endeavor to get better acquainted with his family.

He has been giving us some housing advice and I have a long list of houses for rent from the Lock Real Estate office. We can pay \$30.00 unfurnished or \$40.00 furnished.

We hope to be in Lawrence about September 1st and will try to get settled well before school starts. Some friends in Kansas City have asked us to stay with them until we get located and we expect to take them up on their proposition.

The \$21.96 expenses has not been forthcoming but I expect the wheels turn slowly.

If there is anything you would like to have Ed and I do before we get to Lawrence, let us know.

Very truly yours,

V. W. Lapp

P.S. In our professional course in Physical Education, we should encourage the most intelligent to continue and have some sort of seminar which is attended by all faculty members and students.
