IN YOUR REPLY REFER TO

Dr. Forrest C. Allen, Director
Dept. Physical Education
University of Kansas
Lawrence, Kansas

Dear Dr. Allen:

I just received a check from Harry Mons of Chicago. I am enclosing herewith my check for this one and one sold thru McFarland Drug Co. last July which I had lost track of. This one is at the rate of two dollars as I had to pay McFarland a four dollar commission, so you and I each make two dollars after cost is taken care of.

I am sending a bill to the Coach of College Park-HiSprings High School, Iowa for one sold thru your recommendation.

Your suggestion is not at all a bad one regarding making the machines in Kansas and when I use up my present stock of machines I will give this serious consideration.

Now I have an idea and I want to see how it strikes you. Gene Tunney is now Athletic Director of the United States Navy and I am wondering if you would care to call to his attention your experience with the use of my machine. If this were to be adopted by the Navy they could use a lot of them. Both the Army and Navy that is the U.S. Military Academy and the Naval Academy Athletic Associations use my machine in their training quarters.

How does this suggestion strike you?

I am feeling better now as I am making a habit of going home to my farm on Fridays and am getting two days a week outdoors. In this way I have raised my blood pressure from one hundred to one hundred eighteen.

With kindest regards, I am,

Sincerely yours,

Frederick W. Lang
