

Roll Away

Your Foot Troubles

LANG FOOT-ARCH EXERCISER CO.

FORSYTH, GEORGIA

Dear Dr. Allen:

Nov. 1, 1979

Through your good efforts I just received a definite order from the University of Texas, signed by M.W.Kelley. It is going forward this day.

I am now having both poplar, red gum and also maple trees cut and sawed and kiln dried enough to make many thousands of Normalizers so that I will have enough to last for a few years and always intend to have raw materials ahead.

Yesterday I got an order from one of the Executives of the American Red Cross for personal use and am going to get a test with their workers, so it came sooner than I expected.

Am laying plans to get credit from West Point if I am correct I believe they are using my machines. I don't like their attitude.

I am plugging away. Regards.

FWL.
