ARMY ATHLETIC ASSOCIATION  
UNITED STATES MILITARY ACADEMY  
WEST POINT, NEW YORK

October 18, 1939.

Dr. Forrest C. Allen  
Basketball Coach  
Kansas University  
Lawrence, Kansas.

Dear Dr. Allen:

I am quite familiar with Mr. Lang's foot normalizer. In fact we have a similar apparatus here in our corrective gymnasium. I hardly believe it is Mr. Lang's own invention. I feel that it has its good points and is beneficial particularly to people troubled with flat anterior-posterior arches. Therefore, we are hardly in the market for such an apparatus as Mr. Lang's. However, wish to thank you for your interest and your correspondence regarding this matter.

The sacro-illiac condition is quite improved, however, as you know those things are often chronic, and can return and give a person considerable trouble at the slightest provocation.

I was glad to see Kansas win the football game last week, and tell your staff I wish them the very best of luck in the coming games. Give my very best to the staff, and wishing you and yours the very best, I remain

Sincerely yours,

Roland Logan
