

Dear Doctor Allen:

Here it is time for football season again and we still watch the teams with a great deal of interest - I know during basketball season news of the Jayhawk team was always welcome over here and believe me it was with pride I told of the great I. U. teams when we had time for a bull session between patrols.

Your Jayhawk rebounds has been coming regularly and always at a time when news of home, I. U. & old friends was just the tonic I needed to build that old morale back up where it belongs - thanks a lot for the good job you have done.

Our work has been quite heavy recently which is due of course to the great drive the Army is making through France. The Germans have been forced to evacuate harbor after harbor and it is our job to be there to stop it. Athletic training really pays off in this game where split second decisions count. Years of making high speed decisions on the Court or football field give you a big advantage on P-T boats where the same broken field tactics are necessary with no time for vacillation.

How did Ray Evans make out in the all star
