

August 3, 1939.

Dr. Vernon W. Lapp,  
426 Bayard Street,  
Iowa City, Iowa.

Dear Dr. Lapp:

We have need for another key to the skeleton cabinet which we have in a classroom upstairs, and I am wondering if you would be kind enough to send us the one that you used. Or, if you left your key here, would you tell us where we might find it?

Summer school has been going along very nicely, and is now drawing to a close. Next Wednesday, the 9th, is the last day. We have all kept quite busy with teaching schedules and the recreational program.

Dr. Elbel has been in the hospital for a couple of weeks with a "strep" and "staf" infection on his upper lip, but he expects to be able to go home in a very few days. We, of course, are happy that he is on the mend.

We trust that things are going along nicely with you and your family.

With best wishes, I am

Very sincerely yours,

Director of Physical Education and Recreation,  
Varsity Basketball Coach.
