

(B) Special movable type for use on concrete or other hard surface play yard. To consist of cup to be imbedded in concrete. Standard to fit in cup as illustrated.

*This abiminated from  
 setup as of 5/29  
 upright mounted on  
 round base  
 considered  
 practical  
 and is removable*

(C) Special fixed type for permanent installation. Tube upright to include 18" added length for anchoring in concrete.

10. Area enclosed by the 6' circle to be considered 'out-of-bounds' and any player entering this area is (1) automatically banished from the game or (2) causes his team to suffer a score penalty. Obviously, the purpose of establishing this 'out-of-bounds' territory is to prevent players from gathering immediately under the basket and in close proximity to the upright and base, and is a definite safety factor. The addition of the conical steel apron assures the ball dropping in territory where the game can continue without interruption.
11. A player crossing the outer 25' radius circle is likewise 'out-of-bounds' and suffers the same penalty.
