Dr. Forrest C. Allen,
Director of Physical Education,
University of Kansas,
Lawrence, Kansas,

Dear 'Phog':

Just a note to tell you that the fine sentiment expressed in your recent letter was very much appreciated, this reached me after our fine visit and 'off the record' talk. I wish to assure you that what you told me in confidence will be treated as such.

I really believe that from a 'health standpoint' you have the best job you have ever had, no worries about the finances or the personnel of the coaching staff. You can center your work on basketball and physical education and forget about the balance of the department..

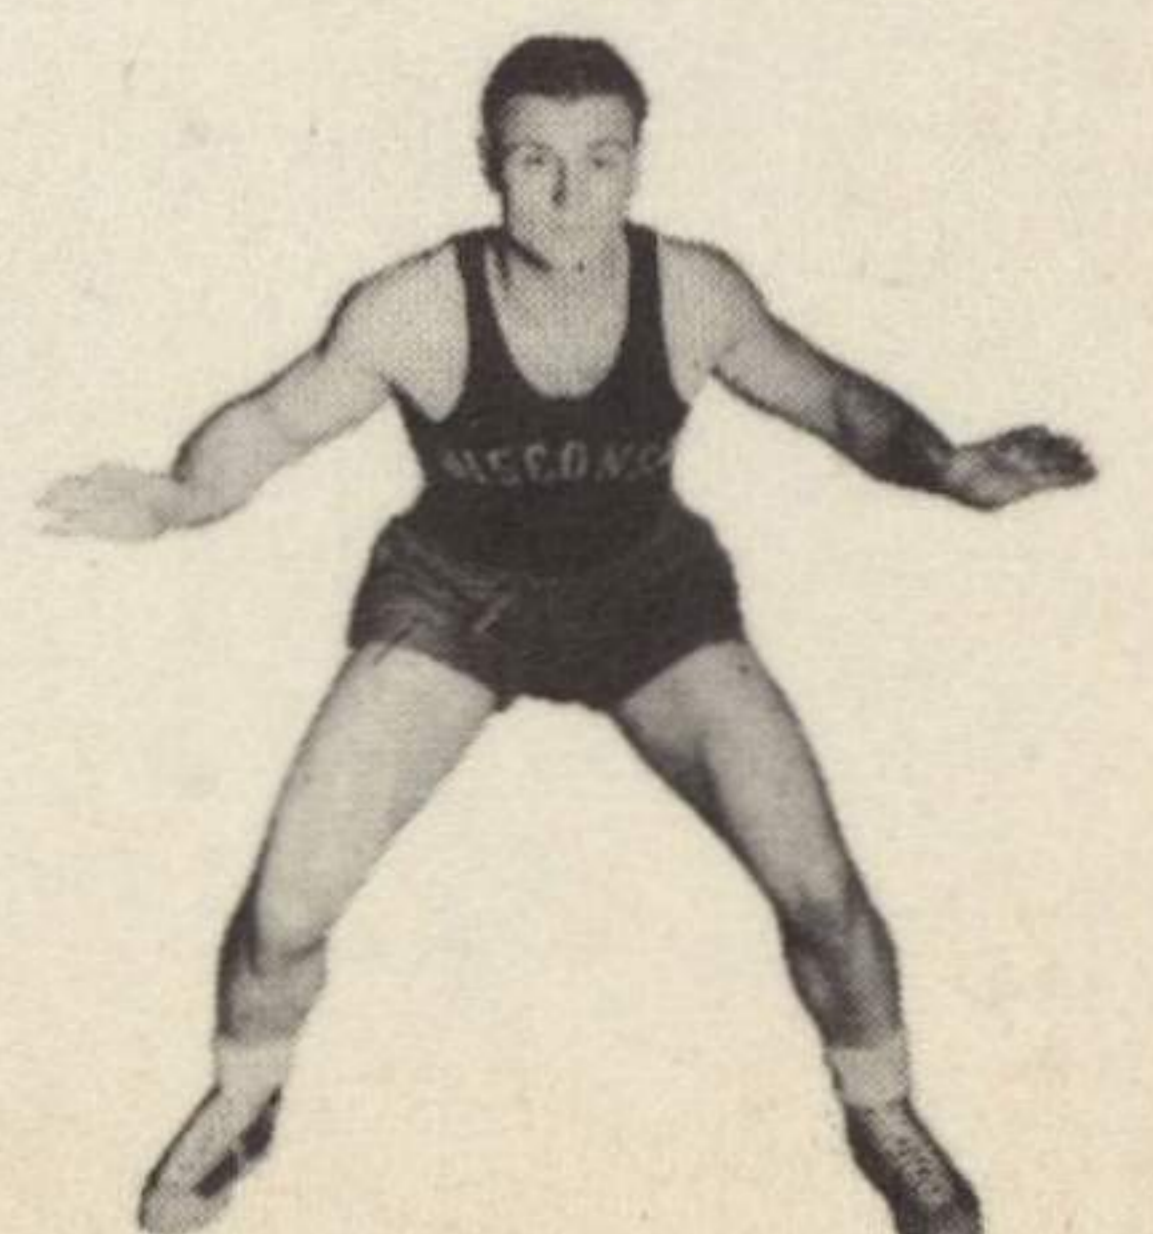

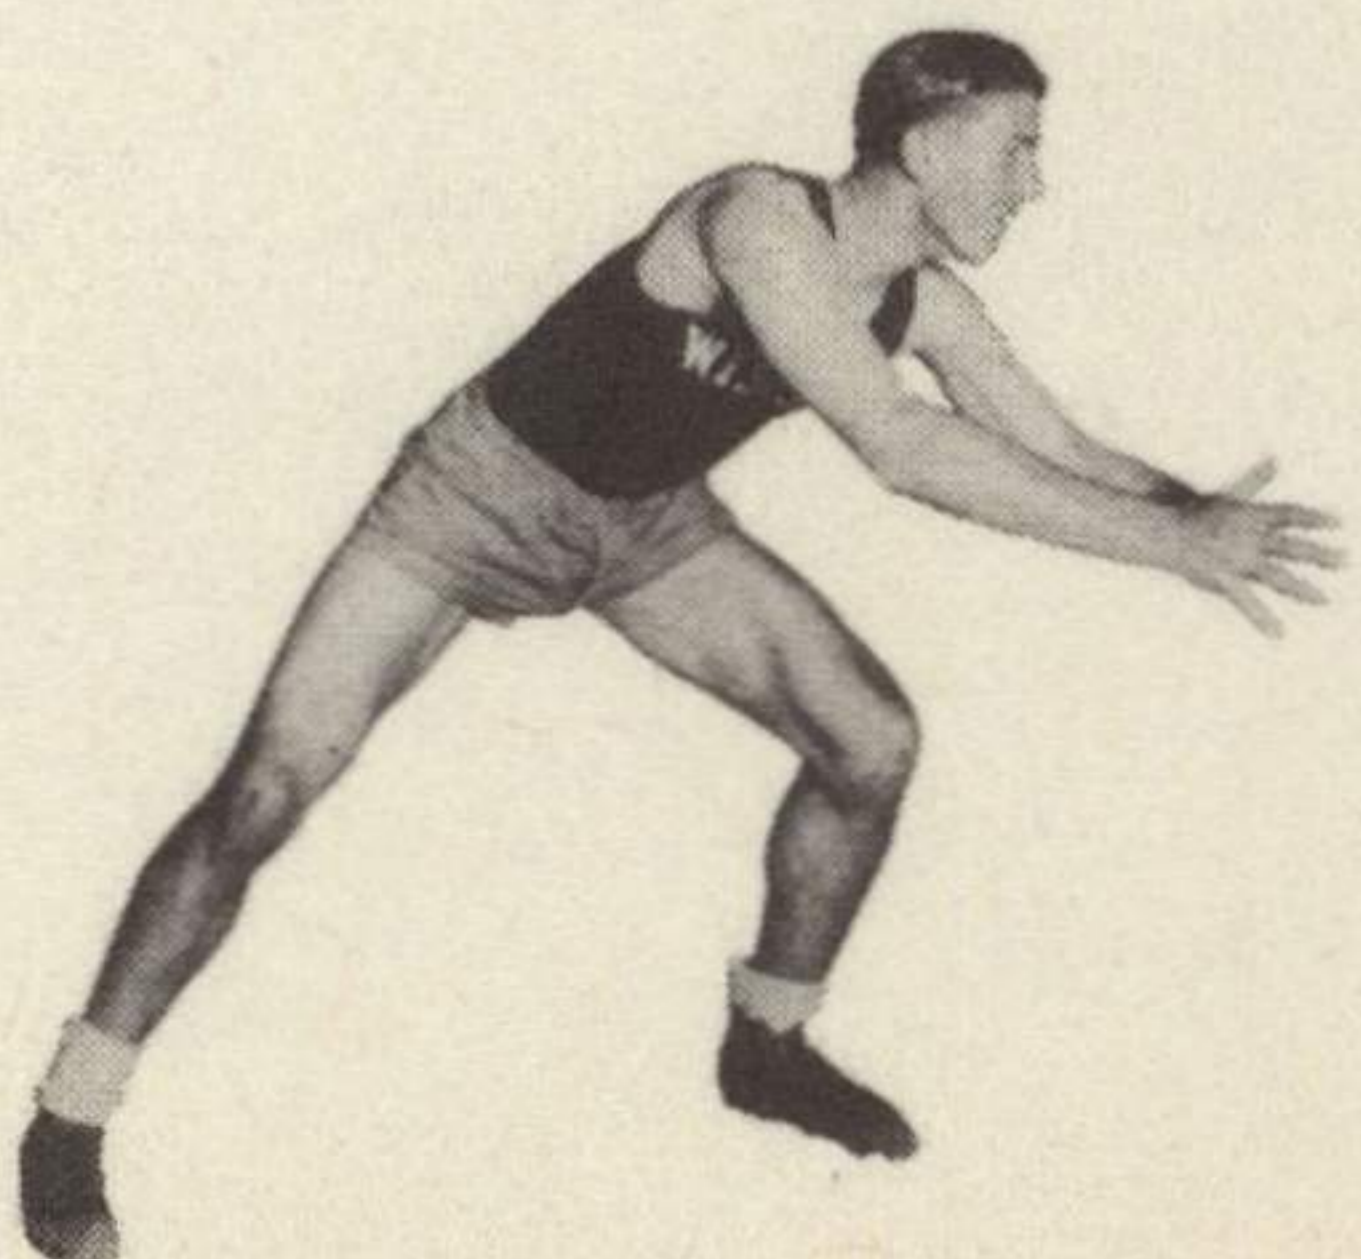

While I do not wish to be commercial, but if at anytime you can influence any business in my direction you may rest assured that both of us will benefit, as you know, I have never represented anything but quality and style merchandise.

In passing I want to say that last week I saw both Andy McDonald and Tad Reid and in them you really have two great friends.

With kindest personal regards, best of wishes and may Dame fortune be partial to you,

Sincerely yours,

Harry
