March 15, 1938

Head of Physical Education Department  
University of Kansas  
Lawrence, Kansas

Dear Sir:

Miss Mary King Montgomery, a graduate student in Physical Education at the University of Kentucky is making a study of the place of music in the professional **physical education curriculum**.

Her study has been prompted by the fact that there is a definite need for some fundamental knowledge of music among the majors in our field in order that they may efficiently and successfully teach rhythm.

I will appreciate any assistance or any comments you may have to make concerning this study.

Respectfully yours,

C. W. Hackensmith, Acting Head  
Department of Physical Education

P. S. May I please have this back by April 1?
