February 4,

Dear Doctor Allen:

First of all I wish to thank you for all you have done for me during the first semester of school. It was really swell of you, and I really did appreciate it very much. I am very sorry that I am not able to continue going to school this second semester as I would really like to, but I am planning on starting again next fall. In the mean time I would like to take some correspondence work and try and make a few grade points and to get a few hours of school out of my way if I possible can. In your most convenient time will you please give me some information on that. I am going to work and would like to do some school work
