

Dr. Forrest C. Allen

-2-

April 21st, 1941.

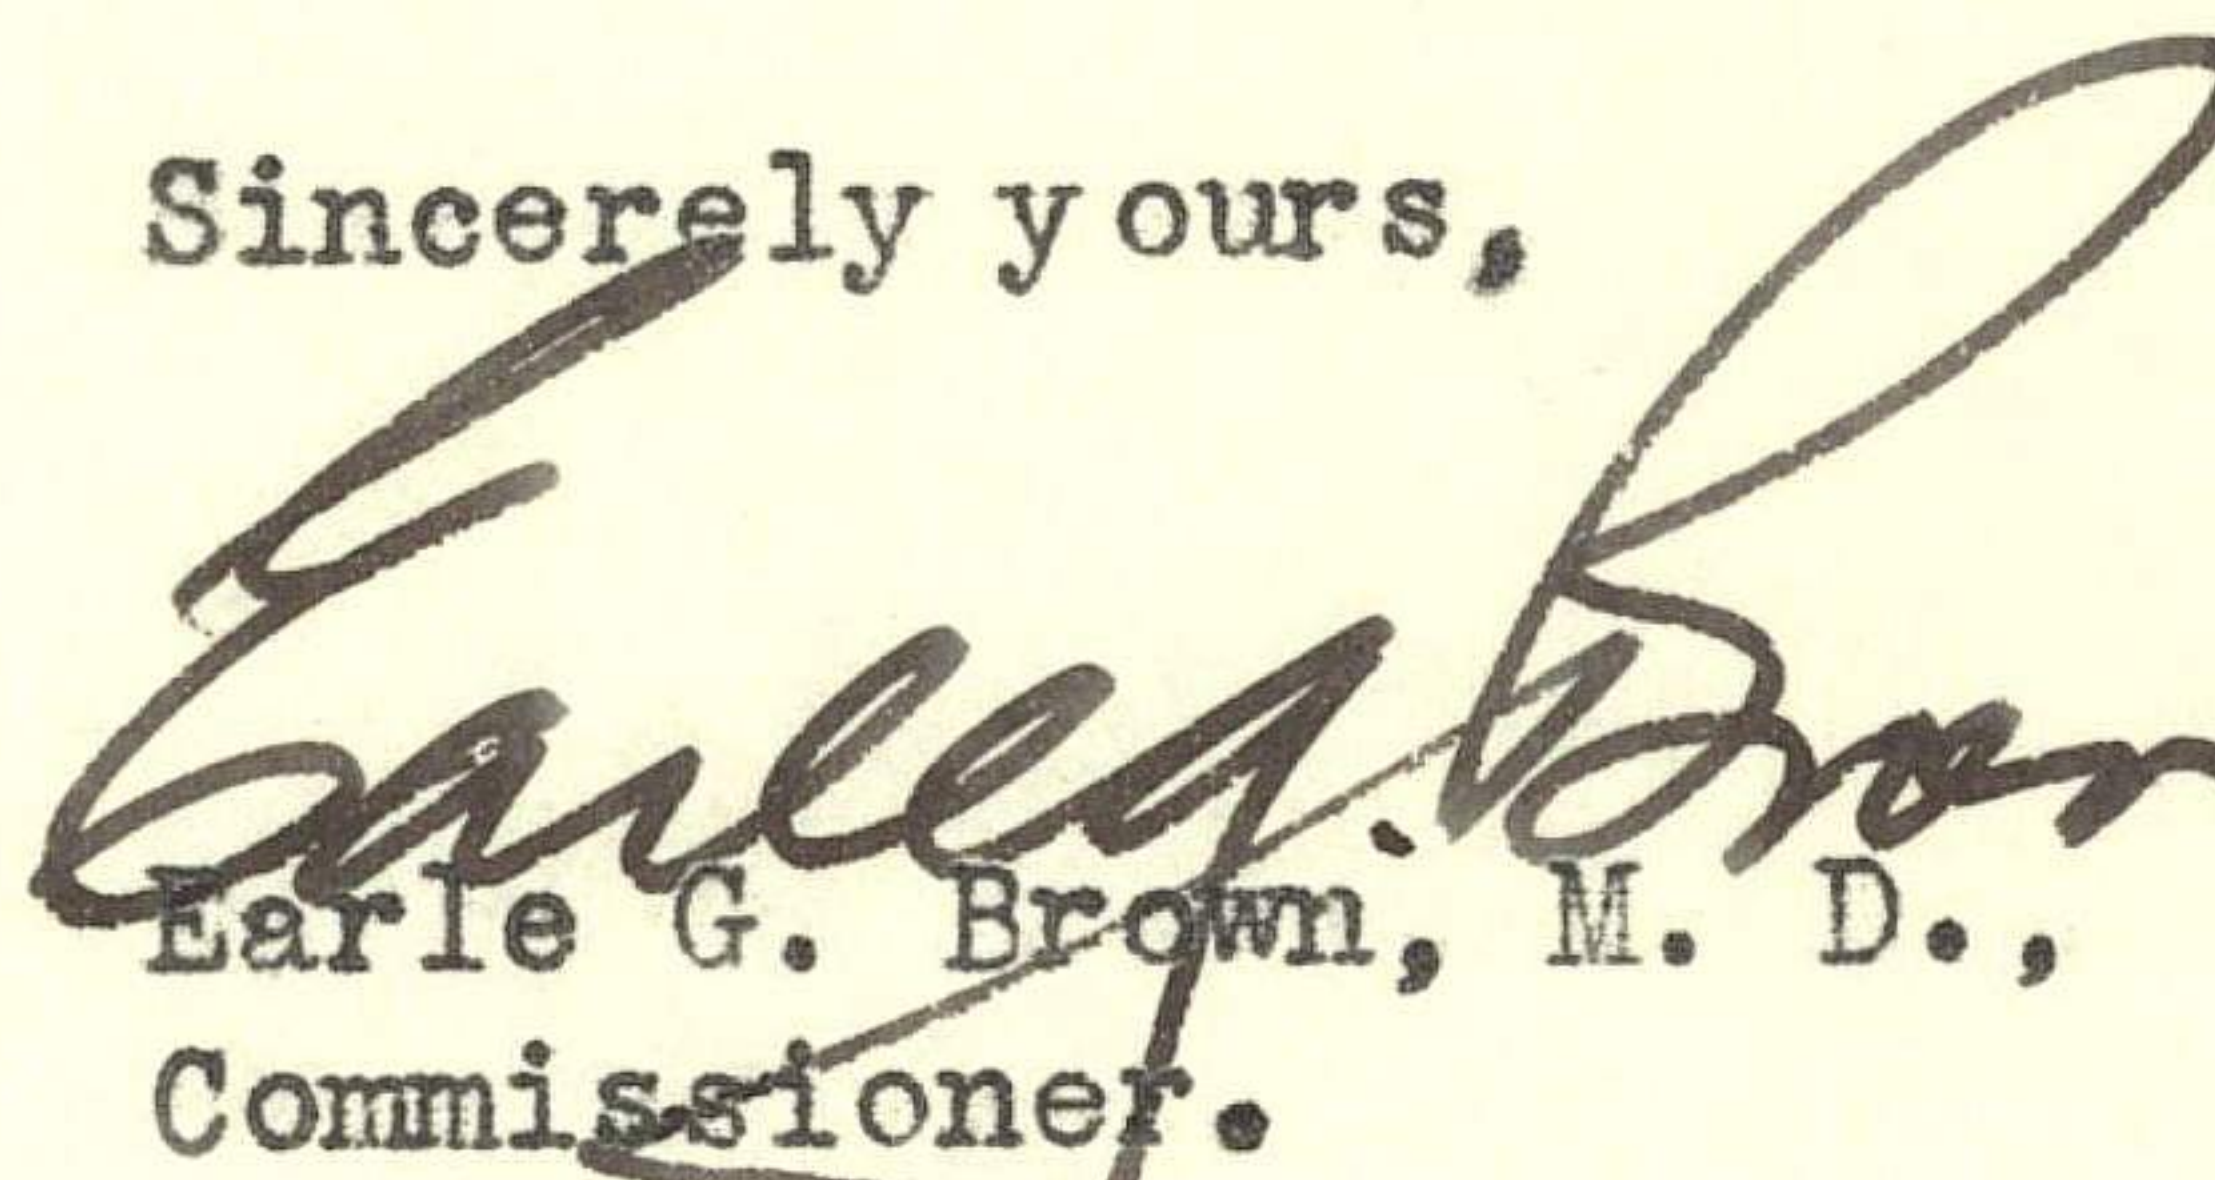

has to report for service.

Had my first fishing trip on the 15th, with fair results. Five of us when out in Great South Bay and brought back 111 flounder. This sounds like a large number but it would be my judgment that perhaps the fish averaged not over 3/4 of a pound, a few of them going to a pound and a half. Anyway we had a nice day on the water and it was pleasant to have that much time off from the office.

Next week I am going to Washington to attend the Conference of State and Provincial Health Authorities and while there hope to see Earnest Boyce.

With kind regards.

Sincerely yours,

 Earle G. Brown, M. D.,  
Commissioner.
