1-5				
75 0000				

^{*} The natural mathematical unit has been set off by solid lines. By using this spacing every team in the even number of team leagues can play daily. Where the natural unit is greater than four, a four game unit is shown by the dotted line. This four game unit provides about the same rest periods for all teams. In using these schedules, draw the numbers for the teams and assign playing dates down the columns.
