

October 22, 1938.

Professor F. A. Russell,  
School of Engineering,  
University of Kansas.

Dear Professor Russell:

I am sending this note to you so that you will have this information when you come to your office Monday morning.

At the Chancellor's reception last Thursday night Professor Laurence Woodruff and Mrs. Woodruff spoke to me about the unsightly south terrace on the intramural field, and asked if we were going to leave it that way. I told them that we intended to seed it.

I talked to the foreman of the labor crew working on the field and he felt he could not hold his men much longer. I have had Mr. Davidson make arrangements for pipe to water the field, as we wanted to use these men while we could.

I felt that in your absence it was necessary to go ahead with these plans if we were going to use the men while they were available.

Sincerely yours,

Director of Physical Education,  
Varsity Basketball Coach.
