

Dr. Allen: page 2

Burt DeGroot just passed through on his way to Lawrence. I feel sure that you are going to like him and that he will work effectively in your organization. I do not know whether I mentioned this fact to you before or not, but Burt's greatest interest is in the field of administration. He did his thesis in this field under me. I really believe that he has something very worthwhile to contribute for the benefit of the high schools in Kansas along this line. I do not know who is teaching the course in administration there now but it may be possible that you will want to use DeGroot's talents in this field.

With best wishes, I am

Very cordially yours,

John W. Bunn,
Dean of Men.
