

April 18th, 1934

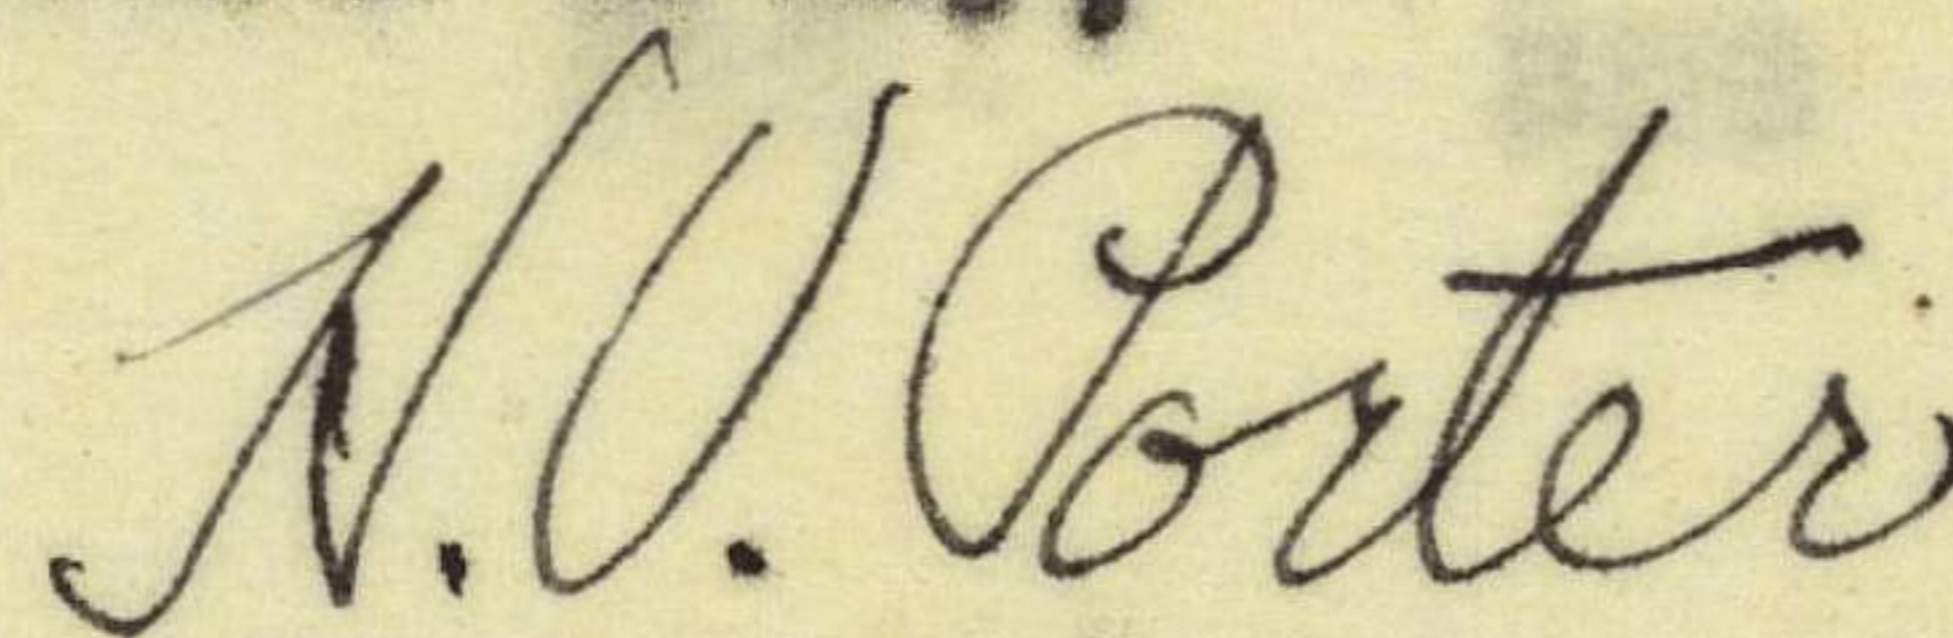

To Members,
National Basketball Rules Committee:

It occurs to me that as a member of the National Rules Committee you might like to have for your files certain data collected either through the basketball questionnaire or through the work of some of the various subcommittees. In order that you may have this material for future reference I am sending under separate cover the following material:

1. A questionnaire summary.
2. A summary of questionnaire results grouped according to the four sections of the country: east, central, south and west. Roughly the states along the Atlantic seaboard are grouped as the eastern section. From the Appalachians to Kansas and Nebraska and as far south as Kentucky the states are grouped as central. Those south of that state are considered southern and those west of Iowa are considered western. This is a rough classification but I believe it will be of some assistance in helping determine sentiment in the various sections. Canada and Canal Zone are also included.
3. A copy of the latest issue of the Illinois High School Athlete which contains certain data on page 99 which deals with basketball statistics.

I hope you may find some of this material of some little value. If it has none, there is always a waste basket nearby.

Yours truly,

H. V. PORTER
