

January 9, 1945.

Mr. George E. Nettels, Vice President,  
Pittsburg & Midway Coal Mining Company,  
Pittsburg, Kansas.

Dear George:

I was mighty happy Curt liked the ball. You tell him that I am counting on him for my varsity. More power to him, and to the Nettels family.

Bob Schwanzle came over to the auditorium yesterday while we were practicing and we had a nice visit. Bob is a fine boy. I was very frank with him regarding the tactics of fraternities in grabbing the boys off the moment they drop out a week or so from their varsity basketball practice. We had a good frank talk, and Bob says after he gets his physics back he is coming out.

Really, he is a fine basketball player and I know he will do us a lot of good. We have an ordinary team and Bob can make a real contribution. But of course he hasn't been out long enough to know the plays and that will handicap him. But he has lots of ability.

With all good wishes to the entire Nettels family, I am

Sincerely yours,

Director of Physical Education,  
Varsity Basketball Coach.
