

Penalties should be devised, if necessary, for "batting away" balls which are above the basket height and appear certain to enter the basket.

- IV. To express approval for a change from four to five as the number of personal fouls causing removal of a player during the regular forty minutes of play. (Increased playing time without center jump and fewer substitutes during war period.)
- V. To advocate a move toward decreasing the number of trips to the foul line. Possibly by reclassification of some fouls into violations.
- VI. To suggest serious consideration of:
 - a) 3 second rule (Probably still desirable)
 - b) 10 second rule (Questionable)
 - c) Massed zoned defense (Undesirable)
- VII. To go on record as:
 - a) Preferring for the colleges, (believing there is a distinct movement in that direction) a rectangular backboard four feet by six of material transparent except for a white border at least two inches wide.
 - b) Suggesting the hoop be somewhat heavier and more nearly rigid than present type allowed. When used with the transparent backboard, should be painted orange.
 - c) Suggesting nets be made of number 120 thread, white cord, and woven in such hour-glass shape as to check momentarily the ball on its way through. Length of the net Medium.
