

Dr. Allen --

This young man (24 years old) is a brother of Irene Nordstrom who teaches at Woodlawn school here in Lawrence. She has told Miss Rich of her brother's interest in completing his work for a degree, and they thought a letter from you might help him make up his mind. He has had 50 some hours at Emporia in physical education and industrial arts, and will need 2 years and one summer here to complete his work. Has had one year of basketball competition at Emporia. Since he has been teaching he has coached championship teams (high school?)

He may return to Westmoreland at \$115 a month, but realizes that he should have a degree. Has been promised a job at the Blue Mill to work for his meals.
