

September 12, 1938.

Mr. George Nettels,
Pittsburg Coal and Mining Co.,
Pittsburg, Kansas.

Dear George:

I immediately got in touch with the people concerned regarding the possibility of Dale Garrison getting on CSEP. I found that there were so many applications already in that he would not have a chance to get in on the allotments that were then being made out; but I did inquire about it.

So I believe the best thing to do is for you to write to the CSEP headquarters or to Raymond Nichols telling him about this boy and that you realize of course it is too late now but you are interested in him and would like to have him put on the eligible list for future attention. Won't you do this and see what sort of a reply you get?

Then I saw Professor F. A. Russell about Dale and told him that Dale would have 64 hours with advanced standing from Pittsburg Teachers College, that he was a good student in technical subjects and would make a good electrical engineering prospect. I stated that you rated him average in his other subjects. Professor Russell said, "Well, tell George to have him come on up and I will do what I can to help him after he gets lined up in his enrollment."

I believe, George, it would be a good idea if you could also write to some of the professors you know in the Engineering School and see if they won't take a friendly interest in him. I assure you that I will do as I said, but of course since he is located in Engineering it is much easier if he could get started right over there. I told you that I would help him out, and of course I would gladly do it, but I would appreciate it if you would endeavor to make these other contacts. I am writing Dale and telling him to stop in when he comes to the University so that we may get better acquainted and be in position to help him.

It was good to see you.

With all good wishes, I am

Sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.
