Dr. F.C. Allen,
Lawrence, Kansas.

Dear Dr. Allen:

I have a boy who hurt his wrist in a game this fall and I was wondering if we could make an appointment with you this Saturday to look at it and advise us about his playing basketball.

The boy plans to play Ban Johnson baseball this summer (and he will really go good as a pitcher) and he is also an outstanding football and basketball player. He is more interested in making good in baseball and is afraid he will hurt his wrist more playing basketball this winter. A doctor advised him not to play but I sort of doubt that it is necessary for him to lay out of basketball. I felt you could advise us better than anyone else.

He is a senior and is really the outstanding athlete in this league i.e all round athlete. He plans to go to Kansas State. Another reason I would like to have you look at his wrist and get acquainted with him.

My home is at Lawrence and I went to Baker University and I would rather see him go to K.U. but that will have to be taken care of later.

If you can give us a little time this Saturday we can be there any time you set.

Very truly,

Ray Nichols
Ray Nichols.
