

Summary

It may be concluded from this report, read in the light of the attached financial statement, that the Memorial Union is practically self-supporting in its operation. That is to say the fees from the student activity ticket amounting to approximately \$7000 or more per annum, are available for completing the interior of the building and maintaining it.

When the building is finally finished internally it is anticipated that the amount contributed by fees will be used in a more strenuous maintenance program and in expanding services which it is customary for Union buildings to offer but which the Kansas Union does not offer. It is also reasonable to anticipate that a certain amount of the fee money will be set aside for the future development and external expansion of the building.
