

UNIVERSITY OF KANSAS  
HEALTH SERVICE  
LAWRENCE, KANSAS

Jan. 29, 1938

Forrest C. Allen,  
Director of Physical Education,  
University of Kansas,  
Lawrence, Kansas.

Dear Doctor Allen:

This will answer two of your recent letters, one of which should have received my attention sooner.

With reference to the radio programs, I do not believe I would care to participate in them.

The American Student Health Association has at the present time a membership of 140 universities and colleges. Membership is held by an institution, through a designated representative department. Dr. Naismith when he was head of the Health Service signed as a charter member of the Association. Membership has been continuous since that time.

The advantages from membership are very much like those in other organizations, namely, meeting of men in similar lines of work at the annual association meetings. The proceedings of meetings and the papers presented each year are published throughout the year in the Journal Lancet, Minneapolis, Minn. We have this magazine on file here at the hospital. A bound copy of the minutes and papers is published at the end of each year. We also have these on file. If you want copies for your library they can be purchased through the secretary of the American Student Health Association, Dr. Ruth Boynton, Health Service, University of Minnesota, Minneapolis, Minn.

The next meeting of the Association will be held in New York City between Christmas and New Year's, 1938.

Sincerely,

*Ralph I. Canuteson*  
Ralph I. Canuteson, M. D.
