

UNITED STATES ARMY  
AIR FORCES

what I knew about the game. I told him that I knew only a little but that I did know the man who invented the game. When he found out your name he very nicely asked me to try & get a set of rules.

My squadron is scheduled to start flying in about two weeks and then leave for Santa Ana about August 3rd. It will seem nice to get in, or even near, a plane after being in the Air Corp for three months and not even see one.

I suppose you are quite busy with summer school, physical education - especially with such a shortage of help. Am looking forward to the next Jayhawk rebound. Hello to Mrs. Allen.

Sincerely,

Charlie Black
