

May 22, 1940.

Mr. James DeFreemery,
President,
Onox, Inc.,
121 Second St.,
San Francisco, Calif.

Dear Mr. DeFreemery:

I have received a letter from the Onox without a signature, but which I assume was sent from your office.

I have talked to Trainer Nesmith about the use of your product and he feels that the methods we use here in the prevention of athlete's foot are satisfactory. For that reason he did not care to use the trial sample of Onox that Norman Meeks requested you to send, and he so told Meeks. It was very late in the school year when the sample arrived, and Nesmith asked Meeks to have it returned to you.

I trust this will clear the matter up to your mutual satisfaction.

Very sincerely yours,

Director of Physical Education and Recreation,
Varsity Basketball Coach.
