

January 20, 1944

Dr. F. C. Allen,  
Department of Physical Education  
University of Kansas

Dear Dr. Allen,

We have measured the space we would like to have covered by a mat, and find it to be ten feet four inches by six feet. We realize it quite probable that you have not mats of this exact size, and we want you to know that it is likely that we can use anything of that approximate size. As you know, we have in our basement a small indoor gym, and we feel a mat under it would <sup>reduce</sup> danger to the children.

Sincerely,

Mary Elizabeth Evans
