

THE OVERLAND ROUTE

The only reason that the height of the basket ^{today} is 10 feet is because the indoor running track at Springfield Mass College was 10 feet from the gym floor and Dr. Naismith attached his baskets to this running track

12 foot baskets would be only for college players who have reached their growth and maturity and not for high school players.

UNION PACIFIC RAILROAD

It is proposed that a field goal would count 3 points and a free throw from the 20 foot line (now 15 ft) would count 1 point. This would equalize the scoring ratio which has long been Dr. Naismith's contention is a field goal should count more than twice as much as a free throw
