

~~What~~ The loss of how much blood is serious? The loss of how much, fatal?

LXII

Define and locate the heart

LXIII

What is the average rate of heart-beat?

LXIV

What are the arteries?

LXV

In first aid, only which arteries are considered?

LXVI

What is the large artery carrying blood away from the left side of the heart called?

LXVII

It is only the main arteries, with which the first aider is concerned: these must lie close to a bone. Why?

LXVIII

Name the six chief points where these main arteries lie close to a bone.
