

May 6th, 1941

Dear Doctor Allen:

This letter includes a few items that you will probably want for your information for next year.

May I recommend for the fencing classes, the following two boys: William Belt, a graduate student in Spanish. (I have already spoken to him and he indicated that if he does return he will probably be in the Spanish Department), and Haven Glassmire, who has been assisting me with the fencing classes. This semester he is an engineering student, and will be back next year. He has spoken to me about the possibility of majoring in Phy. Ed. I am suggesting both of these boys as the only individuals capable of handling fencing classes for the department.

Concerning the swimming pool, I am listing the names of some boys who have at this time passed and have received their instructor's certificate from the Red Cross. They are: Robert Stevens, freshman, and the other boy is Gene Nelson, a senior engineer, next year. If these two boys are not available, may I suggest the names of Dick Epps, a senior Red Cross man, and Gene Mahoney, who has an instructor's certificate.

If there are any other questions or problems that you would like to discuss with me before I leave, I would be glad to make such arrangements to see you.

Sincerely,

James Report
