

September 3, 1940

Dear Dr. Allen:

Wiebe called to my attention today the fact that the paint on the floor under the rubber mats in front of the women's showers is peeling off, the floor is damp under the mats, and the mats have a musty odor. I imagine this is about what happened to the floor on the men's side.

The painters are planning on starting work on the dressing room floors, the pool and springboard (giving them the coat of sand you recommended) about tomorrow, and we wondered if you thought the floor in front of the women's showers should have the same treatment. Since you will not return to the office before the men are finished with the floors, I thought I should write you about this matter, and await your reply.

I am enclosing the letter you wrote Dean Schwegler which carries a note from him. Dean Schwegler would like to hear from you regarding Don Blair. He would also like to have this letter returned to him for his files.

As far as I know Miss Stapleton and Miss Hoover are here, also Mr. Raport, and Dr. Elbel has returned.

We have had quite a bit of rain the last week, and the weather is wonderful.

Sincerely yours,
