Dr. E. R. Elbel  
Department of Physical Education  
University of Kansas

Dear Dr. Elbel:

I think there are certain courses, such as archery and golf, where there is a definite expense attached, for which a laboratory fee should be charged.

I am of the opinion that if we buy balls for golf and targets and arrows for archery that a fee should be attached because this equipment is expensive. Dutch Uhrlaub in teaching golf used 300 golf balls. I believe if we are going to allow students to use this equipment they should help bear the expense.

I would suggest that you talk to Burt DeGroot and Miss Stapleton and get their opinions as to what laboratory fee should be charged, and let me know. I should like to make this fee arrangement a policy for us to follow, beginning with next semester.

Sincerely yours,

Director of Physical Education and Recreation  
Varsity Basketball Coach
