Dec. 2, 1940

Dr. F. C. Allen
Director of Phys. Ed. and Recreation
University of Kansas

Dear Dr. Allen:

At least four usable basketballs are needed immediately in the towel room. All the balls that are in the towel room now either have leaky bladders or split seams.

We have a box of old basketballs in the equipment room upstairs that were returned from the sporting goods company as "beyond repair". The balls in the towel room now are in about the same condition as the latter.

With intramural basketball season starting this week, there will be a greater demand for basketballs.

Yours sincerely,

E. B. De Groot, Jr.
