Miss Ruth Hoover
Robinson Gymnasium
University of Kansas

Dear Miss Hoover:

I learn with regret the loss of an archery target and face which disappeared one night this week.

It has always been my emphatic conviction that these should be chained down, but more than that, I believe they should be put away each night and put up each morning.

We have the Bee House down there now and it could be used for storage. If there is no way of locking the targets to the standards, then they should be taken care of each night and morning.

I remember making a very emphatic statement that they would be taken if they were left loose in that location.

It might be well to have some interested soul observe the fraternity and sorority house play fields.

Sincerely yours,

Director of Physical Education and Recreation
Varsity Basketball Coach
