

November 23, 1939.

Dean L. D. Havenhill,
School of Pharmacy,
University of Kansas.

Dear Dean Havenhill:

We have ordered a jar of the ointment, Fungo, and will send it to you when it arrives for analysis. We run in to so much ring worm, excema and athletes foot, and so forth - all fungus developments, and we would like to know what this contains. It does a good job.

After making the analysis I would appreciate it if you would give us a general idea of the cost. This is a departmental venture.

Very sincerely yours,

FCA:AH

Director of Physical Education and Recreation,
Varsity Basketball Coach.
