Members of the Physical Education Faculty:

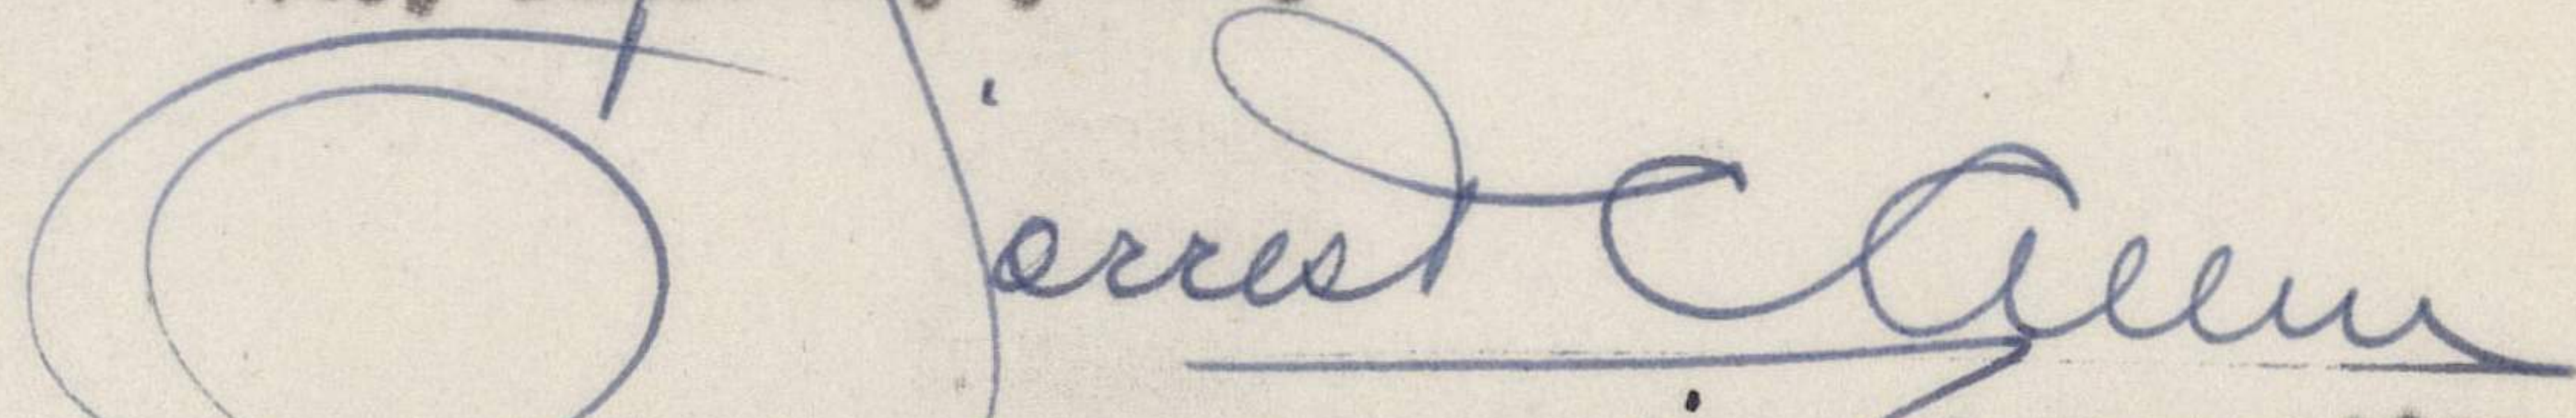

I have just received a letter from Dean Lawson in which he states:

"We are constantly looking for ways and means of clarifying our enrollment schedules in the hope of avoiding difficulties in enrollment. May I suggest, therefore, that it would seem to be advisable to print in the schedule the date on which the second half semester's work in the various exercise classes begins. There are various reasons for this suggestion, one of them being that the boys enrolled for the first half of the semester in Varsity Athletics may not know that the second half semester of exercise begins before they may be through with the Varsity Athletics of the first half of the semester. At any rate, I make this suggestion for your consideration. If you adopt the suggestion, I think the date should be printed for the beginning of the second half semester's work in both the fall and spring catalogues."

I have written Dean Lawson that we would be very glad to follow this suggestion. This is merely a progress report to keep you advised of the happenings in the department.

Here's a laugh -- Dean Lawson, in stating that he intends to place our request for approval of the course in Equitation before his Administrative Committee, says that he thinks Equitation sounds mighty high-falutin'. Further, he states, "I can just imagine students saying, 'Here I go for my daily equitation!'" I would say that slogan is worth the money.

Very sincerely yours,

Director of Physical Education and Recreation
Varsity Basketball Coach
