

Dr. F. C. Allen

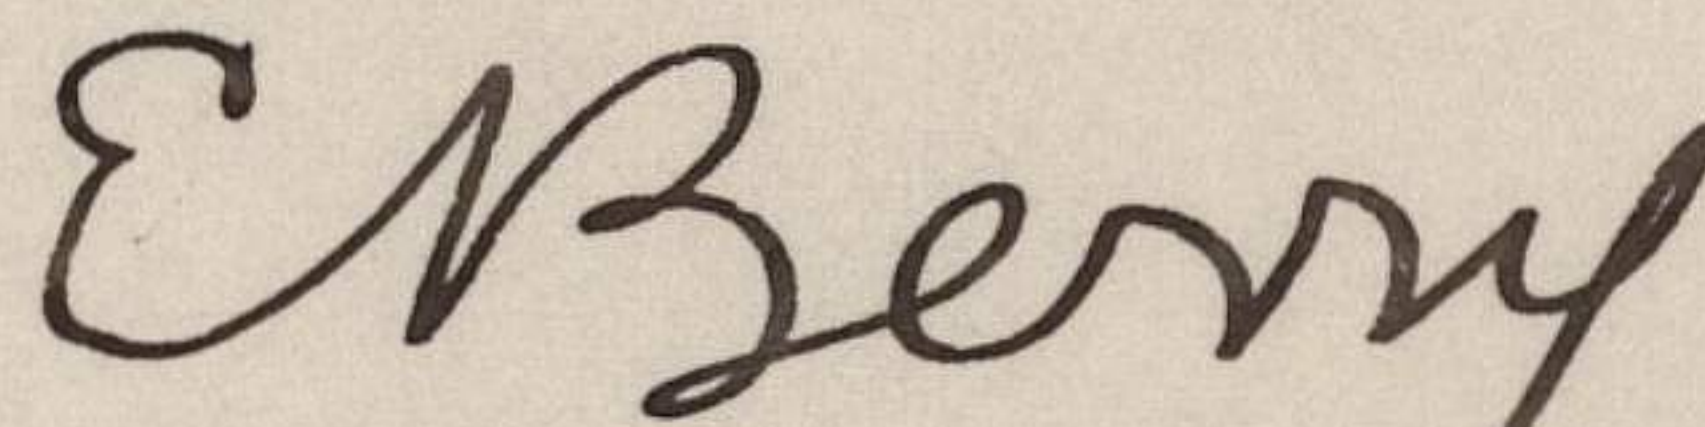

-2-

May 24, 1937

But why don't you think up some youngster like myself? Now, for instance, I am 57 years young; think I have ten good years yet and our Y. M. C. A. retirement fixes it so that it would be possible for me to get out now almost any time. An opportunity to get through with administrative work and more again into real teaching and the philosophical side of our work, wouldn't be at all without some attraction. Besides, as you perhaps remember, Nebraska is my home and the "Dust Bowl" might not be so bad.

Sorry I can't give you more help and better advice.

Sincerely,

Chairman Graduate Council  
Natural Science Division
