Dr. Forrest C. Allen, Director
Department of Physical Education
University of Kansas
Lawrence, Kansas

Dear Doctor Allen:

Your letter of June 30th should have received an earlier reply. I am sorry for the delay.

I have written to the various secretaries of national organizations to which I referred in my letter of May 27th calling attention to your new responsibilities and to your interest in setting up a working relationship with their organizations. I think, however, that I misinterpreted myself rather carelessly in these letters. As a matter of fact, the American Student Health Association carries an institutional membership and not an individual membership. The University of Kansas is a member of that Association. For that reason, any division of the University of Kansas may attend the national meetings of this Association without setting up any formal personal relationship. This same fact applies, as you know, to the National Collegiate Athletic Association. The reorganization of the American Physical Education Association as a part of the National Education Association is based upon individual membership. The same thing is true of the College Physical Education Association. I urge that you make use of the institutional memberships indicated above and that you join as an individual the two physical education associations to which I have referred. As the Director of the Department of Physical Education, you are responsible officially to your University for a clear understanding of the programs and progress of each one of these several organizations. You will find them more than worthwhile.

Cordially yours,

THOMAS A. STOREY, M.D.
General Director
