

Costs of C. S. E. P. labor was used

I sincerely believe that this six hole golf course can be maintained in first class conditions for \$15 00. a year provided student labor is furnished by C. S. E. P.

If 3 more holes are added the maintenance should not be more than \$20 00 a year after they are built - building these extra holes would be optional and require some mowing of trees and extra labor.

It is my belief that this course could be supervised by expert hands - and kept in first class conditions <sup>with</sup> ~~for~~ the above approved budget.

Sincerely Glenn Dalman  
golf coach
